Managing Director's Compliance Statement and Endorsement

This Compliance Assessment Report is submitted by Chevron Australia Pty Ltd (the Proponent) in accordance with Condition 4 of Ministerial Statement 873 (MS 873).

The Proponent is compliant with the conditions referred to in MS 873 (as amended), with the exception of Potential Non-compliances with MS 873 Condition 14.3 and Condition 17.1.

I, Mark Hatfield, as Managing Director of the Proponent, endorse this Compliance Assessment Report.

Signed: _____

Name: Mark Hatfield
Managing Director
Chevron Australia Pty Ltd

Date: _____

17/11/21

1 Introduction

This Compliance Assessment Report (the Report) was prepared to meet the requirements of Condition 4 of Ministerial Statement 873 (MS 873).

This Report addresses the compliance status of the Wheatstone Development (the Project) with the conditions referred to in MS 873 (as amended by MS 903, 922, and 931 and Attachments 4 and 5) for works carried out during the reporting period 31 August 2020 to 30 August 2021.

Chevron Australia Pty Ltd (CAPL) is compliant with the conditions referred to in MS 873 (as amended), with the exception of Potential Non-compliances with MS 873 Condition 14.3 and Condition 17.1.

The status of the Ministerial Statement conditions for the reporting period 31 August 2020 to 30 August 2021 are included in the Compliance Assessment Table (Table 4-1).

1.1 Scope of the Report

This Report relates to the conditions of MS 873. Condition 4.3 of MS 873 requires CAPL to assess compliance with conditions in accordance with the Compliance Assessment Plan (Ref. 1) required by Condition 4.1 of MS 873.

1.2 Proponent

CAPL is the proponent and the person taking the action for the Wheatstone Development on behalf of its current joint venture participants, pursuant to MS 873. The Wheatstone Development is a joint venture between Australian subsidiaries of:

- Chevron Corporation
- Kuwait Foreign Petroleum Exploration Company
- Woodside Petroleum Limited
- Kyushu Electric Power Company
- PE Wheatstone Pty Ltd, part owned by JERA Co., Inc.

1.3 Project Overview

CAPL operates a multi-train liquefied natural gas (LNG) plant and a domestic gas (DomGas) plant near Onslow on the Pilbara coast, Western Australia (WA). The Wheatstone Development processes gas from various offshore fields in the West Carnarvon Basin. The Ashburton North Strategic Industrial Area (ANSIA) is the approved site for the LNG and Domgas plants.

The Wheatstone Development comprises gas gathering, export, and processing facilities in Commonwealth and State waters and on land. The Wheatstone Development produces gas from Production Licences WA-46-L, WA-47-L, and WA-48-L, 145 km offshore from the mainland, ~100 km north of Barrow Island and 225 km north of Onslow, and also processes gas from Production Licence WA-49-L operated by Woodside Petroleum Limited.

The ANSIA site is ~12 km south-west of Onslow along the Pilbara coast, within the Shire of Ashburton. The foundation Wheatstone Development comprises two LNG processing trains, with a nominal combined capacity of 8.9 million tonnes per

annum (MTPA). Environmental approval was granted for a 25 MTPA plant to allow for expected further expansions. The Domgas plant is a separate but collocated facility and forms part of the Wheatstone Development. The Domgas plant ties-in to the existing Dampier to Bunbury Natural Gas Pipeline infrastructure via the third-party DBP Development Group Pty Ltd Domgas pipeline.

1.4 Environmental Approvals

The Wheatstone Development was assessed through an Environmental Impact Statement / Environmental Review and Management Program assessment process under the *WA Environmental Protection Act 1986* (EP Act) and the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act).

The Wheatstone Development was approved by the WA Minister for Environment; Water on 30 August 2011 by way of MS 873 and as amended by MS 903, MS 922, MS 931 and Attachments and 5. On 30 January 2013, the WA Minister for Environment; Water approved revised environmental protection outcomes under Condition 8.7 to allow for trunkline installation. On 22 April 2020, the WA Minister for Environment approved the deletion of Conditions 6.12, 9.1 to 9.5, and 12.1 to 12.8 by way of MS 1130.

The then Commonwealth Minister for Sustainability, Environment, Water, Population and Communities (SEWPaC; now Department of Agriculture, Water and the Environment [DAWE]), approved the Wheatstone Development on 22 September 2011 (EPBC 2008/4469), with variations to EPBC 2008/4469 Conditions 2, 3, 5, 6, 8, 44, 45, 47, 54, 55, 56, 58, 66e, 71, 71A, and 71B made pursuant to section 143 of the EPBC Act.

2 Status of Implementation

During the reporting period:

- Significant progress has been made on the Wheatstone Development since construction began in December 2011. The Project has been operational and exporting LNG since 2017 and supplying domestic gas to WA since 2019.
- Chevron announced it would supply Alcoa of Australia Limited with an additional 37 petajoules of equity domestic gas over a multi-year term from its portfolio across the Gorgon, Wheatstone, and North West Shelf facilities.

3 Reporting Methodology

3.1 Auditing Methodology

The auditing methodology for this Report follows the Compliance Assessment Process as described in Section 3 of the Compliance Assessment Plan (Ref. 1).

3.2 Reporting Potential Non-compliances and Corrective and Preventive Actions

In accordance with Condition 4.6(iii) of MS 873, any potential non-compliances with the conditions of MS 873 that were identified during the reporting period are to be reported in this Report. Table 4-1 details the compliance status with the conditions.

3.3 Compliance Status Terminology

For this Report, CAPL has adopted the Action Implementation Status terminology from the former Office of the Environmental Protection Authority's (OEPA; now Department of Water and Environmental Regulation [DWER]) Post Assessment Guideline for Preparing an Audit Table document (Ref. 2). This terminology is listed in Table 3-1 and is used for reporting compliance status in Table 4-1.

Table 3-1: Compliance Status Terms

Status	Description
Compliant	Implementation of the proposal has been carried out in accordance with the requirements of the audit element
Completed	A requirement with a finite period of application has been satisfactorily completed
Not Required at this Stage	The requirements of the audit element were not triggered during the reporting period
Potentially Non-compliant	Possible or likely failure to meet the requirements of the audit element
Non-compliant	Implementation of the proposal has not been carried out in accordance with the requirements of the audit element
In Process	Where an audit element requires a management or monitoring plan be submitted to the OEPA or another government agency for approval, that submission has been made and no further information or changes have been requested by the OEPA or the other government agency and assessment by the OEPA or other government agency for approval is still pending

3.4 Public Availability of the Report

In accordance with the Compliance Assessment Plan (Ref. 1) and Condition 4.6(iv) of MS 873, this Report will be made publicly available within one month of being submitted to DWER. A copy of the Report will be placed on CAPL's website for at least 12 months, after which the Report will be made available, where appropriate, on request.

4 Compliance Findings for MS 873 (as amended)

Compliance with the conditions of MS 873, and subsequent amendments by MS 903, 922, 931, and 1130 is shown in Table 4-1 for the reporting period 31 August 2020 to 30 August 2021.

Table 4-1: MS 873 Compliance Assessment Table

Notes:

- Common phases of development referred to in this table include: Design, Pre-Construction, Construction, Operation, Decommissioning and Closure, Overall (several or all phases).
- This table summarises the MS 873 conditions that apply to the Wheatstone Development. The Requirement column is intended to accurately reflect the content of MS 873; however, in the event of any deviation, the contents of MS 873 shall take precedence.
- The abbreviation 'M' in the Audit Code denotes an implementation condition as per the OEPA's Post Assessment Guideline for Preparing an Audit Table document (Ref. 2).
- If a condition of MS 873 is replaced or amended during an assessment period, this compliance audit table will record the condition as it was, the date of the amendment, and the condition in its amended form. The compliance assessment for that period will then assess compliance with whichever relevant condition applied up to, and then after, the date of the condition amendment. In subsequent assessment periods, the date of the condition amendment will be noted, but the audit table will only include the amended condition.
- Where the WA Department of Environment and Conservation (DEC) Chief Executive Officer (CEO) is referred to in the requirement column, this shall be taken to mean the WA Department of Water and Environment Regulation (DWER) Director General (as a result of organisational changes made by the WA Government in July 2017).
- Where the Commonwealth Department of Environment and Water (DEW), Commonwealth Department of Environment, Water, Heritage and the Arts (DEWHA), the Commonwealth Department of Sustainability, Environment, Water, Population and Communities (SEWPaC), the Commonwealth Department of the Environment (DotE), or the Commonwealth Department of the Environment and Energy (DotEE) is referred to, this shall be taken to mean the Commonwealth Department of Agriculture, Water and the Environment (DAWE).
- Where the WA Department of Industry and Resources (DoIR) or the WA Department of Mines and Petroleum (DMP) is referred to, this shall be taken to mean the WA Department of Mines, Industry Regulation and Safety (DMIRS).
- Where the WA Department of Fisheries (DoF) is referred to, this shall be taken to mean the WA Department of Primary Industries and Regional Development (DPIRD).
- Where the WA Department of Water (DoW) or the Office of the Environmental Protection Authority (OEPA) is referred to, this shall be taken to mean the WA Department of Water and Environment Regulation (DWER).
- Where the WA Department of Parks and Wildlife (DPaW) is referred to, this shall be taken to mean the WA Department of Biodiversity, Conservation, and Attractions (DBCA).
- Where the Wildlife Conservation Act 1950 (WA) is referred to, this shall be taken to mean the Biodiversity Conservation Act 2016 (WA).
- Lighter text is the historic evidence of compliance from previous MS 873 Compliance Assessment Reports, which is included for completeness where appropriate.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
873:M1.1	Proposal Implementation	The Proponent shall implement the Proposal as documented and described in Schedule 1 of this statement subject to the conditions and procedures of this statement.	The Proposal (Project) will be implemented in accordance with the conditions and schedules of this Statement.	Annual Compliance Assessment Report.	Overall	For life of Project.	Compliant	The Wheatstone Project was implemented in accordance with the requirements of MS 873 (as amended) as detailed in this Compliance Assessment Report.
873:M2.1	Proponent Nomination and Contact Details	The Proponent for the time being nominated by the Minister for Environment under sections 38(6) or 38(7) of the <i>Environmental Protection Act 1986</i> is responsible for the implementation of the Proposal.	The Proponent acknowledges that they are responsible for the implementation of the Proposal.	Annual Compliance Assessment Report.	Overall	For life of Project.	Compliant	The nominated Proponent for the Proposal did not change during the reporting period.
873:M2.2	Proponent Nomination and Contact Details	The Proponent shall notify the CEO of any change of the name and address of the Proponent for the serving of notices or other correspondence within 30 days of such change.	Notify the CEO (OEPA) of any change to contact name or address.	Communication to the CEO (OEPA) of change of contact name and address.	Overall	Within 30 days of change of contact name and address of the Proponent	Not required at this stage	There was no change to the name and/or address of the nominated Proponent during the reporting period.
873:M3.1	Time Limit of Authorisation	The authorisation to implement the Proposal provided for in this statement shall lapse and be void five years after the date of this statement if the Proposal to which this statement relates is not substantially commenced.	Written advice to the CEO (OEPA).	Correspondence from the Proponent to the CEO (OEPA) stating that the Project has been substantially commenced.	Pre-construction/ Construction	Within 5 years after the date of this Statement (30 August 2016).	Completed	Submission letter from CAPL to OEPA, 6 January 2015 (WS0-0000-HES-LET-CVX-EPA-00188). Approval letter from OEPA, 8 January 2015 (WS0-0000-HES-LET-EPA-CVX-00203).
873:M3.2	Time Limit of Authorisation	The Proponent shall provide the CEO with written evidence which demonstrates that the Proposal has substantially commenced on or before the expiration of five years from the date of this statement.	Written advice to the CEO (OEPA).	Correspondence from the Proponent to the CEO (OEPA) stating that the Project has been substantially commenced.	Construction	Within 5 years after the date of this Statement (30 August 2016).	Completed	See 873:M3.1.
873:M4.1	Compliance Reporting	The Proponent shall prepare and maintain a Compliance Assessment Plan to the satisfaction of the CEO.	Prepare and maintain a Compliance Assessment Plan and submit to the CEO (OEPA) for approval.	Compliance Assessment Plan Records demonstrating CEO (OEPA) satisfaction with the Compliance Assessment Plan.	Overall	At least 6 months prior to the first annual compliance assessment report being required under	Compliant	Compliance Assessment Plan Revision 2 (WS0-0000-HES-PLN-CVX-000-00054-000; Ref. 1). Submission letter from CAPL to OEPA, 30 July 2014 (WS0-0000-HES-LET-CVX-EPA-00249)

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
						873:M4.6, or prior to Project construction, whichever is sooner. For life of Project.		Approval letter from OEPA, 13 August 2014 (WS0-0000-HES-LET-EPA-CVX-00187). No update was made to the Compliance Assessment Plan Revision 2 (WS0-0000-HES-PLN-CVX-000-00054-000) during the reporting period.
873:M4.2	Compliance Reporting	The Proponent shall submit to the CEO the Compliance Assessment Plan required by condition 4.1 at least six months prior to the first compliance report required by condition 4.6, or prior to construction, whichever is sooner. The Compliance Assessment Plan shall indicate: i. the frequency of compliance reporting; ii. the approach and timing of compliance assessments; iii. the retention of compliance assessments; iv. the method of reporting of potential non-compliances and corrective actions taken; v. the table of contents of compliance assessment reports; and vi. public availability of compliance assessment reports.	Submit to the CEO the Compliance Assessment Plan.	Records demonstrating submission of the Compliance Assessment Plan.	Pre-construction	At least six months prior to the first annual compliance assessment report being required under 873:M4.6, or prior to Project construction, whichever is sooner.	Completed	Compliance Assessment Plan Revision 1 (WS0-0000-HES-PLN-CVX-000-00054-000). Submission letter from CAPL to OEPA, 3 July 2012 (WS0-0000-HES-LET-CVX-EPA-00056). Approval letter from OEPA, 12 July 2012 (WS0-0000-PUB-LET-EPA-CVX-00010).
873:M4.3	Compliance Reporting	The Proponent shall assess compliance with conditions in accordance with the Compliance Assessment Plan required by condition 4.1.	Assess compliance with conditions in accordance with the Compliance Assessment Plan.	Annual Compliance Assessment Report. Records to establish that assessment of compliance with conditions occurred in accordance with the Compliance Assessment Plan.	Overall	Annually	Compliant	See 873:M4.6.
873:M4.4	Compliance Reporting	The Proponent shall retain reports of all compliance assessments described in the Compliance Assessment Plan required by condition 4.1 and shall make those reports available when requested by the CEO.	Retain copies of all annual Compliance Assessment Reports and provide to the CEO (OEPA) upon CEO (OEPA)'s request.	Annual Compliance Assessment Report. Annual Compliance Assessment Reports within Chevron Document Management System. Records demonstrating provision of annual Compliance Assessment Report to CEO (OEPA) when requested by the CEO (OEPA).	Overall	For life of project	Compliant	Annual Compliance Assessment Reports are retained in CAPL's Document Management System.
873:M4.5	Compliance Reporting	The Proponent shall advise the CEO of any potential non-compliance within seven days of that non-compliance being known.	Report any potential non-compliance to the CEO (OEPA) within 7 days of that non-compliance being known.	Annual Compliance Assessment Report. Records demonstrating all potential non-compliance(s) reported to the CEO (OEPA) within 7 days of that potential non-compliance being known.	Overall	Within 7 days of a potential non-compliance being known.	Compliant	A potential non-compliance with 873:M17.1 was identified on 6 October 2020 and reported to DWER on 13 October 2020 (ABU201000604). See 873:M17.1.
873:M4.6	Compliance Reporting	The Proponent shall submit to the CEO the first compliance assessment report fifteen months from the date of issue of this Statement addressing the twelve month period from the date of issue of this Statement and then annually from the date of submission of the first compliance	Submit to the CEO the first annual compliance assessment report.	Annual Compliance Assessment Report. Records demonstrating submission of the annual Compliance Assessment Report to the CEO (OEPA). Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		assessment report. The compliance assessment report shall: i. be endorsed by the Proponent's Managing Director or a person delegated to sign on the Managing Director's behalf; ii. include a statement as to whether the Proponent has complied with the conditions; iii. identify all potential non-compliances and describe corrective and preventative actions taken; iv. be made publicly available in accordance with the approved compliance assessment plan; and v. indicate any proposed changes to the compliance assessment plan required by condition 4.1.				previous Report for the life of the Project		31 August 2020 to 30 August 2021. This Report is to be submitted by 30 November 2021.
873:M5.1	Final Marine Infrastructure Plan	Prior to the construction of the nearshore and offshore marine facilities listed in Schedule 1 for this Proposal, unless otherwise approved by the CEO, the Proponent must prepare a final Marine Infrastructure Plan which is to be approved by the CEO, on advice of the Dampier Port Authority, which details the nearshore and offshore marine facilities. The plan must also show the proposed location(s) for anchoring the Offshore Accommodation Vessel.	Prepare a final Marine Infrastructure Plan.	Final Marine Infrastructure Plan. Records demonstrating CEO (OEPA) approval of the final Marine Infrastructure Plan. If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M5.1.	Pre-construction	Prior to constructing the nearshore and offshore marine facilities listed in Schedule 1 of this Statement, unless otherwise approved by the CEO (OEPA).	Completed	Marine Infrastructure Plan (MIP) Revision 1 (WS0-0000-HES-PLN-CVX-000-00089-000). Submission letter from CAPL to OEPA, 12 February 2013 (WS0-0000-HES-LET-CVX-EPA-00104). Approval letter from OEPA, 25 February 2013 (WS0-0000-HES-LET-EPA-CVX-00087).
873:M5.2	Final Marine Infrastructure Plan	The Proponent shall provide the CEO with the approved Marine Infrastructure Plan described in Condition 5.1 and spatial data locating the nearshore and offshore marine facilities, in a Geographical Information System (GIS) compatible format specified by the CEO.	Provide the CEO with the approved Marine Infrastructure Plan described in Condition 5.1 and spatial data locating the nearshore and offshore marine facilities, in a GIS-compatible format specified by the CEO.	Records demonstrating provision of the approved Marine Infrastructure Plan to the CEO (OEPA). Records demonstrating provision of spatial data to the CEO (OEPA) in a compatible format specified by the CEO (OEPA).	Pre-construction	Prior to constructing the nearshore and offshore marine facilities listed in Schedule 1 of this Statement, unless otherwise approved by the CEO (OEPA).	Completed	See 873:M5.1.
873:M5.3	Final Marine Infrastructure Plan	The Proponent shall construct the nearshore and offshore marine facilities listed in Schedule 1 consistent with the approved Marine Infrastructure Plan.	Construct the nearshore and offshore marine facilities listed in Schedule 1 consistent with the approved Marine Infrastructure Plan.	Records demonstrating that the nearshore and offshore marine facilities listed in Schedule 1 have been constructed consistent with the Marine Infrastructure Plan approved by the CEO (OEPA).	Construction	During construction of the nearshore and offshore marine facilities.	Completed	The nearshore and offshore facilities have been constructed in accordance with the approved MIP.
873:M5.4	Final Marine Infrastructure Plan	The Proponent must locate the Offshore Accommodation Vessel more than 500 metres from any sessile benthic filter feeder communities or benthic primary producer habitat (other than soft bottom microphytobenthos) at a location(s) approved by the CEO.	Anchor any Offshore Accommodation Vessel at a location(s) approved by the CEO (OEPA).	Records of approval from the CEO (OEPA) for location(s) of the Offshore Accommodation Vessel. Records demonstrating that the Offshore Accommodation Vessel has been located as approved by the CEO (OEPA).	Overall	Prior to anchoring offshore accommodation vessel.	Not required at this stage	No offshore accommodation vessels were used during the reporting period.
873:M5.5	Final Marine Infrastructure Plan	The Offshore Accommodation Vessel (if any) shall be anchored for this Proposal using an appropriate mooring system approved by the CEO that minimises	Anchor any Offshore Accommodation Vessel using a mooring system approved by the CEO (OEPA).	Records of approval from the CEO (OEPA) of the mooring system for the Offshore Accommodation Vessel.	Overall	Prior to anchoring offshore accommodation vessel.	Not required at this stage	See 873:M5.4.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		anchor chains scouring the adjacent seafloor and associated habitats.		Records demonstrating that the Offshore Accommodation Vessel has been anchored using the mooring system approved by the CEO (OEPA).				
873:M5.6	Final Marine Infrastructure Plan	The Proponent shall locate the Offshore Accommodation Vessel (if any) consistent with the principles and suggested measures contained in the EPA Environmental Assessment Guideline No. 5 unless otherwise approved by the CEO.	Locate the Offshore Accommodation Vessel (if any) consistent with the principles and suggested measures contained in the EPA Environmental Assessment Guideline No. 5 unless otherwise approved by the CEO.	Records demonstrating that the Offshore Accommodation Vessel has been located consistent with the EPA Environmental Assessment Guideline No. 5. If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M5.6.	Overall	Prior to anchoring offshore accommodation vessel.	Not required at this stage	See 873:M5.4.
873:M6.1	Construction of Marine Facilities	The Proponent shall ensure the construction of nearshore and offshore marine facilities achieves the following environmental protection outcomes: i. no irreversible loss of, or serious damage to, coral habitats outside of the Zone of High Impact shown in Figure 3 of Schedule 1; ii. no irreversible loss of, or serious damage to, filter feeder habitats outside of the Zone of High Impact shown in Figure 3 of Schedule 1; iii. no irreversible loss of, or serious damage to, seagrass, macroalgal and other benthic habitats outside of the Zone of High Impact shown in Figure 4 of Schedule 1; iv. protection of at least 70% of baseline live coral cover on each designated reef formation (see Figure 2 of Schedule 1) within the Zone of Moderate Impact shown in Figure 3 of Schedule 1; v. no detectable reduction of net live coral cover within the Zone of Influence shown in Figure 5 of Schedule 1 vi. no detectable net negative change from the baseline state of filter feeder, seagrass, macroalgal and other benthic habitats determined by implementing condition 7, outside of the Zones of High and Moderate Impact, shown in Figures 3 and 4 of Schedule 1, whichever figure is relevant to the habitats above, unless and until, at a specified site(s) outside the Zones of Moderate Impact or specified designated reef formation(s) or site(s) in the Zones of Moderate Impact, a revised environmental protection outcome has been approved by the Minister in accordance with condition 6.10 to have effect for that specified site(s) or specified designated reef formation(s), in which case the approved revised environmental protection outcome for the specified site(s) or designated reef formation(s) shall be	Implement the approved Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan required by 873:6.3.	Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan. Monitoring results obtained under the Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan. Records demonstrating Ministerial approval of revised environmental protection outcomes.	Construction	Prior to and during the construction for the nearshore and offshore marine facilities.	Completed	Construction works were completed in 2017.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		achieved in the construction of the nearshore and offshore marine facilities.						
873:M6.2	Construction of Marine Facilities	Notwithstanding the Environment Protection Outcomes specified in condition 6.1 which the Proponent must achieve, the Proponent shall design and execute turbidity-generating activities which are part of the construction of the nearshore and offshore marine facilities with the aim of achieving the following management objectives: i. Within the Zone of High Impact shown in Figure 3 of Schedule 1: protection of at least 50% of baseline live coral cover on each of the following two reef formations: a) End of Channel Shoal; and b) Saladin Shoal, which are shown in Figure 2 of Schedule 1; ii. Within the Zone of Moderate Impact shown in Figure 3 of Schedule 1: no detectable reduction of net live coral cover at any designated reef formation in this zone; and iii. Within the Zone of Influence shown in Figure 5 of Schedule 1: no detectable reduction of net live coral cover within this zone.	Design and execute the approved Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan required by 873:M6.3 with the aim of achieving the management objectives of 873:M6.2.	Records demonstrating that the approved Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan has been implemented.	Overall	Prior to and during the construction for the nearshore and offshore marine facilities.	Completed	Construction works were completed in 2017.
873:M6.3	Construction of Marine Facilities	Prior to the commencement of turbidity-generating activities which are part of the construction of the nearshore and offshore marine facilities, unless otherwise approved by the CEO, the Proponent shall prepare a Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan that meets the objectives set out in condition 6.4 to be approved by the CEO.	Prepare a Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan and seek approval from the CEO (OEPA).	Records demonstrating CEO (OEPA) approval of the Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan. If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M6.3.	Pre-construction	Prior to the commencement of turbidity-generating activities that are part of the construction for the nearshore and offshore marine facilities.	Completed	Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan (DDSPMMP) Revision 2 (WS0-0000-HES-RPT-CVX-000-00086-000). Submission letter from CAPL to OEPA, 13 December 2012 (WS0-0000-HES-LET-CVX-EPA-00091). Approval letter from OEPA, 21 January 2013 (WS0-0000-HES-LET-EPA-CVX-00078).
903:M6.4 (effective from 06 July 2012)	Construction of Marine Facilities	The objectives of the Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan are to ensure that turbidity-generating activities which are part of the construction of the nearshore and offshore marine facilities: i. achieve the environmental protection outcomes set in condition 6.1 (or any approved revised environmental protection outcome); and ii. are managed with the aim of achieving the management objectives set out in condition 6.2.		Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan approved by CEO (OEPA).	Pre-construction	Prior to the commencement of turbidity-generating activities that are part of the construction for the nearshore and offshore marine facilities.	Completed	See 873:M6.3.
903:M6.5 (effective from 06 July 2012)	Construction of Marine Facilities	The Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan shall include: i. descriptions of monitoring sites, including key physical attributes, geographic locations and measures of the baseline condition of benthic communities to be monitored;	Prepare a Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan to include the requirements listed in 903:M6.5.	Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan approved by CEO (OEPA).	Pre-construction	Prior to the commencement of turbidity-generating activities that are part of the construction for the nearshore and offshore marine facilities.	Completed	See 873:M6.3.

Letter from DWER, 14 September 2018, confirming the DWER does not require the second post development survey to be undertaken (WS0-0000-HES-LET-EPA-CVX-00253).
873:M7.3	State of the Marine Environment Surveys	The Scope of Works for surveys of the marine environment required in condition 7.2 shall include the following where relevant having regard to when the survey is conducted: i. Procedures and methods for the collection of quantitative environmental data for: a. water quality; b. hydrodynamic conditions including direction and velocity of water currents; c. the physical characteristics of native sediments and development-influenced sediments suspended in the water column and deposited on the benthos; d. the natural and development-influenced rates, and spatial and temporal patterns of sediment deposition; e. the spatial extent, distribution, community composition (at a suitable taxonomic resolution to differentiate different communities), natural variability including seasonality and condition of benthic habitats; and f. the preparation of benthic habitat maps. ii. timing for the implementation and completion of the surveys having regard to the types and sequence of surveys referred to in condition 7.2; iii. procedures for the use of survey data to assess compliance with relevant environmental protection outcomes in conditions 6.1 and 8.7; and iv. timing and frequency of reporting. Note: In the case of the hard coral components of benthic habitats referred to in condition 7.3, a measure of condition shall include live coral cover at each of the designated reef formations in the Zones of Moderate Impact shown in Figure 2 of Schedule 1.	Prepare Scope of Works to include the requirements listed in 873:M7.3.	Scope of Works as approved by the CEO (OEPA).	Pre-construction	Prior to the implementation of the approved Scope of Works for surveys of the marine environment.	Completed	See 873:M7.1 and 873:M7.2.
873:M7.4	State of the Marine Environment Surveys	Prior to the commencement of marine works and in accordance with the approved Scope of Works required under condition 7.3, the Proponent shall	Undertake the baseline state of the marine environment survey.	Records demonstrating that the baseline state of the marine environment survey	Pre-construction	Prior to the commencement of marine works.	Completed	See 873:M7.2.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		undertake the baseline state of the marine environment survey.		was conducted before marine works commenced. Copy of baseline state of the marine environment survey.				
873:M7.5	State of the Marine Environment Surveys	At the time specified in the approved Scope of Works and in accordance with the approved Scope of Works, the Proponent shall undertake the surveys for the state of the marine environment at the mid-term of the marine works.	Undertake the state of the marine environment survey at the mid-term of the marine works.	Records demonstrating that the state of the marine environment survey was undertaken at the mid-term of the marine works.	Construction	At the mid-term of the marine works as specified in the approved Scope of Works.	Completed	See 873:M7.2.
873:M7.6	State of the Marine Environment Surveys	At the time specified by the approved Scope of Works and in accordance with the approved Scope of Works, the Proponent shall undertake the surveys for the state of the marine environment at the post-development stage of the marine works.	Undertake the surveys for the state of the marine environment at the post-development stage of the marine works.	Records demonstrating that the surveys for the state of the marine environment were undertaken at the post-development of the marine works.	Operation	At the post-development stage of the marine works as specified in the approved Scope of Works.	Completed	See 873:M7.2.
873:M7.7	State of the Marine Environment Surveys	No longer than 5 years following completion of marine works required for the construction of marine facilities or the trunkline and in accordance with the approved Scope of Works, the Proponent shall undertake a second post development state of the marine environment survey to determine compliance with the environmental protection outcomes set in conditions 6.1 and 8.7 (or any approved revised environmental protection outcome), unless otherwise approved by the Minister.	Undertake a second post-development state of the marine environment survey.	Records demonstrating that the second post-development state of the marine environment survey was undertaken no longer than 5 years after the completion of marine works. If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M7.6.	Operation	No longer than 5 years after the completion of marine works required for the construction of marine facilities or the trunkline and in accordance with the approved Scope of Works.	Completed	Letter from CAPL to DWER, 4 April 2018, requesting DWER waive the ministerial requirement for CAPL to undertake a second post-development survey (WS0-0000-HES-LET-CVX-EPA-00353). Letter from DWER, 14 September 2018, confirming the DWER does not require the second post-development survey to be undertaken (WS0-0000-HES-LET-EPA-CVX-00253).
873:M7.8	State of the Marine Environment Surveys	The Proponent shall report the findings of the baseline state of the marine environment survey required by condition 7.4 to the CEO within three months of having completed that survey.	Baseline state of the marine environment report.	Records demonstrating that the baseline state of the marine environment report was submitted to the CEO (OEPA) within the timeframe required.	Pre-construction	Within 3 months of having completed the baseline state of the marine environment survey.	Completed	State of the Marine Environment Surveys Baseline Report Revision 0 (WS0-0000-HES-RPT-CVX-000-00155-000). This survey was completed on 11 April 2013. Letter from CAPL to OEPA, 11 July 2013 (WS0-0000-HES-LET-CVX-EPA-00139).
873:M7.9	State of the Marine Environment Surveys	The Proponent shall report the findings of subsequent state of the marine environment surveys required by conditions 7.5, 7.6 and 7.7 and include in each report an appraisal of compliance with environmental protection outcomes set in condition 6.1 and condition 8.7 having regard to any relevant approved revised environmental protection outcome, to the CEO within four months of having completed each survey.	Mid-term state of the marine environment report. Post-development state of the marine environment report. Second post-development state of the marine environment report.	Copies of the state of the marine environment reports and records demonstrating that the reports were submitted to the CEO (OEPA) within the timeframe required.	Overall	Within 4 months of having completed the subsequent state of the marine environment surveys.	Completed	Mid-Term State of the Marine Environment Report Revision 0 (WS0-0000-HES-RPT-CVX-000-00223-000). This survey was completed on 18 December 2014. Submission letter from CAPL to OEPA, 16 April 2015 (WS0-0000-HES-LET-CVX-EPA-00288). First Post-Development State of the Marine Environment Report Revision 0 (WS0-0000-HES-RPT-CVX-000-00253-000). This survey was completed on 7 December 2015. Submission letter from CAPL to OEPA, 6 April 2016 (WS0-0000-HES-LET-CVX-EPA-00311). No second post-development state of the marine environment survey was undertaken. See 873:M7.7.
873:M8.1	Trunkline Installation	The Proponent shall, prior to the commencement of the trunkline installation activities, unless otherwise approved by the CEO, prepare a Trunkline Route and Infrastructure Plan, to be approved by the CEO, on the advice of the Dampier Port Authority.	Prepare a Trunkline Route and Infrastructure Plan.	Records demonstrating CEO (OEPA) approval of the Trunkline Route and Infrastructure Plan. If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M8.1.	Pre-construction	Prior to the commencement of the trunkline installation activities.	Completed	Trunkline Route and Infrastructure Plan (TRIP) Revision 1 (WS0-0000-HES-PLN-CVX-000-00073-000). Submission letter from CAPL to OEPA, 20 March 2013 (WS0-0000-HES-LET-CVX-EPA-00114). Approval letter from OEPA, 28 March 2013 (WS0-0000-HES-LET-EPA-CVX-00094).

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
873:M8.2	Trunkline Installation	The objective of Trunkline Route and Infrastructure Plan is to accurately describe, including with the use of spatial data, the actual trunkline route to be used, trunkline installation methods, and activities that will be associated with the trunkline installation activities following that route.	Prepare a Trunkline Route and Infrastructure Plan.	Trunkline Route and Infrastructure Plan approved by the CEO (OPEA).	Pre-construction	Prior to the commencement of the trunkline installation activities.	Completed	See 873:M8.1.
873:M8.3	Trunkline Installation	The actual trunkline route to be used shall be contained wholly within the corridor and investigative area shown on Figure 7 of Schedule 1 and described by coordinates provided in Table 3 of Schedule 1.	Prepare and implement approved Trunkline Route and Infrastructure Plan.	Trunkline Route and Infrastructure Plan approved by the CEO (OPEA).	Overall	Prior to and during implementation of trunkline installation activities.	Completed	The trunkline route was installed as per the approved Trunkline Route Infrastructure Plan (TRIP) (WS0-0000-HES-PLN-CVX-000-00073-000).
873:M8.4	Trunkline Installation	Trunkline Route and Infrastructure Plan shall include: i. a sufficient number of scale, spatially-rectified maps and/or technical drawings to show the configuration and location of all components of the trunkline to be installed within State waters; ii. geo-spatial information describing the actual trunkline route to be used and the associated centre-line of trunkline for its full length in State waters; iii. geo-spatial information describing the Trunkline Direct Disturbance Footprint, Zone of High Impact, Zones of Moderate Impact about the actual trunkline route to be used, as defined in condition 8.5; iv. geo-spatial information describing the predicted Zone of Influence for the actual trunkline route and construction methods to be used, based on modelling outputs; v. benthic habitat maps showing the extent and distribution of different benthic habitats coincident with the Zone of High Impact and Zones of Moderate Impact and at representative sites in the Zones of Influence as defined in condition 8.5; vi. a table setting out the areas, in hectares, of the different benthic habitats within the Trunkline Direct Disturbance Footprint, Zone of High Impact and the Zones of Moderate Impact; and vii. descriptions of the key trunkline installation activities and the measures taken to design the trunkline route and execute the trunkline installation activities to minimise, as far as is reasonably practicable, the impacts to benthic habitats.	Prepare Trunkline Route and Infrastructure Plan.	Trunkline Route and Infrastructure Plan approved by the CEO (OPEA).	Pre-construction	Prior to the commencement of the trunkline installation activities.	Completed	See 873:M8.1.
931:M8.5 (effective from 30 January 2013)	Trunkline Installation	The proponent shall implement the approved Trunkline Route and Infrastructure Plan required under condition 8.4, and will exercise all practicable means to minimise the impacts of trunkline installation activities so that impacts fall within the spatial limits defined for sections of the trunkline route in the Trunkline Route and Infrastructure Plan, or within the Trunkline Direct Disturbance Footprint and Zones of impact, whichever	Implement approved Trunkline Route and Infrastructure Plan.	Records demonstrating implementation of the approved Trunkline Route and Infrastructure Plan. Records demonstrating CEO (OEPA) agreement for an alternative Zone of High Impact and/or Zones of Moderate Impact.	Construction	During trunkline installation activities.	Completed	See 873:M8.3. Trunkline installation activities were completed in August 2016.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<p>is less. For the purpose of condition 8, the Trunkline Direct Disturbance Footprint and Zones of impact are defined as follows:</p> <p>i. the Trunkline Direct Disturbance Footprint, which lies within the Zone of High Impact defined in condition 8.5(ii), is not to extend beyond:</p> <p>a. 80 metres in width about the trunkline to approximately 5000 metres in a straight line distance from the trunkline shore crossing, unless otherwise approved in writing by the CEO;</p> <p>b. 25 metres either side of the trunkline centre-line from approximately 5000 metres (in a straight line distance from the trunkline shore crossing) to the State Waters boundary, unless otherwise approved in writing by the CEO;</p> <p>ii. the Zone of High Impact about the trunkline is not to extend beyond 525 metres of the centre-line of trunkline for the length of the trunkline in State waters;</p> <p>iii. Zones of Moderate Impact about the trunkline are those areas beyond the Zone of High Impact defined in condition 8.5(ii), but are not to extend more than 1,525 metres either side of the centre-line of the trunkline for the length of the trunkline in State waters; and</p> <p>iv. Zones of Influence are areas beyond the Zones of Moderate Impact defined in condition 8.5(iii), predicted in accordance with the requirements of condition 8.4(iv), unless the Proponent justifies, to the requirements of the CEO on the advice of the Dampier Port Authority, that having exercised all practicable means to minimise the impacts of trunkline installation activities, an alternative Zone of High Impact and/or Zones of Moderate Impact are warranted.</p>						
873:M8.6	Trunkline Installation	Reef formations at Ashburton Island and Brewis Reef shown in Figure 2 of Schedule 1 shall not be contained within either the Zone of High Impact or the Zones of Moderate Impact defined in condition 8.5.	Prepare Trunkline Route and Infrastructure Plan.	Trunkline Route and Infrastructure Plan approved by the CEO (OPEA). Trunkline Installation Environmental Monitoring and Management Plan approved by the CEO (OEPA).	Pre-construction	Prior to the commencement of the trunkline installation activities.	Completed	See 873:M8.3. Trunkline installation activities were completed in August 2016.
873:M8.7	Trunkline Installation	The Proponent shall undertake turbidity-generating activities associated with trunkline installation in State waters consistent with the approved Trunkline Route and Infrastructure Plan and ensure that each of the following environmental protection outcomes are achieved:	Implement approved Trunkline Route and Infrastructure Plan. Implement approved Trunkline Installation Environmental Monitoring and Management Plan.	Records demonstrating implementation of the approved Trunkline Route and Infrastructure Plan. Monitoring results obtained under the Trunkline Route and Infrastructure Plan. Monitoring results obtained under the Trunkline Installation	Construction	During trunkline installation activities.	Completed	See 873:M8.3. Trunkline installation activities were completed in August 2016.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<p>ii. no irreversible loss of, or serious damage to, seagrass habitat outside of the Trunkline Direct Disturbance Footprint;</p> <p>iii. no irreversible loss of, or serious damage to, coral habitats outside of the Zone of High Impact.</p> <p>iii(a) no irreversible loss of, or serious damage to filter feeder habitats outside of the Zone of High Impact;</p> <p>iv. no detectable net negative change from the baseline state of seagrass habitats determined by implementing condition 7, outside of the Zone of High Impact;</p> <p>v. no detectable net negative change from the baseline state of filter feeder and macro algal habitats determined by implementing condition 7, outside the Zone of High Impact and the Zones of Moderate Impact; and</p> <p>vi. no detectable reduction of net live coral cover within the Zones of Influence, including reef formations at Ashburton Island and Brewis Reef, unless and until, at a specified site(s), outside the Zones of Moderate Impact or reef formations at Ashburton Island or Brewis Reef or site(s) in the Zones of Moderate Impact, a revised environmental protection outcome has been approved to have effect for that specified site(s) or reef formation(s) by the Minister in accordance with condition 8.16, in which case the approved revised environmental protection outcome for the specified site(s) or designated reef formation(s) shall be achieved due to turbidity-generating activities associated with trunkline installation.</p>		<p>Environmental Monitoring and Management Plan.</p> <p>Records demonstrating Ministerial approval of revised environmental protection outcome(s).</p>				
873:M8.8	Trunkline Installation	<p>Notwithstanding the Environment Protection Outcomes specified in condition 8.7 which the Proponent must achieve, the Proponent shall design and execute trunkline installation activities in State waters with the aim of achieving the following management objectives:</p> <p>i. irreversible loss of, and serious damage to, benthic habitats is restricted to the area within the Trunkline Direct Disturbance Footprint (excluding macroalgal habitats to which there shall be no irreversible loss or serious damage);</p> <p>ii. impacts to the marine environment within the Zones of Moderate Impact are minimised to the greatest extent practicable; and</p> <p>iii. cumulative impacts from turbidity-generating activities associated with trunkline installation undertaken simultaneously with turbidity-generating activities associated with the construction of the nearshore and offshore marine</p>	<p>Prepare and Implement approved Trunkline Route and Infrastructure Plan.</p> <p>Prepare and Implement approved Trunkline Installation Environmental Monitoring and Management Plan.</p>	<p>Monitoring results obtained under the Trunkline Route and Infrastructure Plan.</p> <p>Monitoring results obtained under the Trunkline Installation Environmental Monitoring and Management Plan.</p>	Overall	Prior to and during trunkline installation activities.	Completed	See 873:M8.3. Trunkline installation activities were completed in August 2016.

		<p>outcome proposed by the Proponent in condition 8.15(viii) and 8.15(ix), for that zone where failure to achieve an environmental protection outcome has been recorded, having regard to the matters provided for in condition 8.15; and</p> <p>b. will ensure that all other environmental protection outcomes set in condition 8.7 continue to be achieved outside the Zones of Moderate Impact (unless a revised environmental protection outcome for a specified site(s) has been approved);</p> <p>xii. if an environmental protection outcome (or any approved revised environmental protection outcome) outside the Zones of Moderate Impact (not including the Zone of High Impact) is not being achieved, the Proponent shall include in the report required by condition 8.15 additional management actions proposed to be implemented so that the recommencement of turbidity-generating activities associated with trunkline installation:</p> <p>a. will not contribute to further non-achievement of any other environmental protection outcomes set in conditions 8.7 (or any approved revised environmental protection outcome); or</p> <p>b. will not cause non-achievement of a revised environmental protection outcome proposed by the Proponent in condition 8.15 (viii) or 8.15(ix) at those sites where failure to achieve an environmental protection outcome (or any approved revised environmental protection outcome) has been recorded or there is strong evidence that non-achievement of an environmental protection outcome (or any approved revised environmental protection outcome) is expected to be recorded as part of the same event; and</p> <p>c. will ensure the environmental protection outcomes set in conditions 8.7 (or any approved revised environmental protection outcome) continue to be achieved at all other sites and reef formations.</p>						
903:M8.16 (effective from 06 July 2012)	Trunkline Installation	The Minister may, having regard to the report submitted by the Proponent under condition 8.15 and on the advice of the Chairman of the EPA, approve revised environmental protection outcome(s) to have effect for the purpose of condition 8.7 in which case the Proponent may then commence, continue or recommence (whichever is relevant) turbidity-generating activities associated with trunkline installation subject to the revised environmental protection outcome(s). The	Implement procedures designed to prevent recommencement of turbidity-generating activities associated with trunkline installation subject to the revised environmental protection outcome(s) until the Minister has approved revised environmental protection outcome(s) in	Records demonstrating Ministerial approval of revised environmental protection outcome(s). Records of turbidity-generating activities associated with trunkline installation.	Construction	Following suspension of any turbidity-generating activities associated with trunkline installation and Ministerial approval of revised environmental protection outcome(s) as outlined in 903:M8.16.	Completed	See 873:M8.13.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		Minister may also, having regard to the report submitted by the Proponent under condition 8.15, require the Proponent to implement all or any of the additional management actions proposed in the report as required by condition 8.15(xi) and (xii) or other additional practicable management actions, as part of the approved Trunkline Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan (condition 8.9).	writing or otherwise in accordance with MS 873.					
873:M8.17	Trunkline Installation	If under condition 8.16 any revised environmental protection outcomes for condition 8.7 are approved, and/or additional management actions are required to be implemented, those approved revised environmental protection outcomes and additional management actions required by the Minister under condition 8.16 shall have effect as if they were part of the approved Trunkline Installation Environmental Monitoring and Management Plan.	Amend Trunkline Installation Environmental Monitoring and Management Plan to include environmental protection outcome(s) and management actions required by 903:M8.16.	Records to demonstrate revised Trunkline Installation Environmental Monitoring and Management Plan is being implemented.	Construction	Following recommencement of turbidity-generating activities associated with trunkline installation.	Completed	See 873:M8.13.
873:M8.18	Trunkline Installation	The Proponent shall not conduct turbidity-generating activities associated with trunkline installation during the period 3 days prior to the predicted commencement of mass coral spawning, or as soon as mass coral spawning is detected if prior to the predicted time, and those turbidity-generating activities are to remain suspended for 7 days from the commencement of mass coral spawning unless it supplies peer-reviewed scientific evidence that if those turbidity-generating activities were to continue during coral mass spawning events, any effect, if it were to occur, would not significantly impact the functional ecology of local and regional reefs, and the CEO provides a written exemption of those turbidity-generating activities from the requirement to cease over the period specified or alter the period that turbidity generating activities must cease.	Implement the approved Trunkline Installation Environmental Monitoring and Management Plan. Provide peer-reviewed scientific evidence showing no significant impact to functional ecology of local and regional reefs.	Records demonstrating implementation of the approved Trunkline Installation Environmental Monitoring and Management Plan. Peer-reviewed scientific evidence submitted to the CEO (OEPA). Records demonstrating CEO (OEPA) provision of a written exemption or alteration in accordance with 873:M8.18.	Construction	Within 3 days prior to the commencement of coral spawning, or as soon as mass coral spawning is detected if prior to the predicted time.	Completed	See 873:M8.13.
873:M9.1 (effective until 22 April 2020)	Coastal Processes	The Proponent shall ensure that construction and operation of the nearshore marine facilities (as defined in Schedule 1) achieve the following outcomes as far as is practicable as measured under the Coastal Processes Monitoring and Management Plan: i. minimise change to littoral sediment transport; ii. minimise an erosion trend under non-cyclonic conditions in the position of the mean sea level shoreline and dune vegetation line between the nearshore marine facilities and Beadon Creek; iii. maintain the functionality of Hooley Creek;	Implement the approved Coastal Processes Monitoring and Management Plan.	Records demonstrating implementation of the approved Coastal Processes Monitoring and Management Plan. Monitoring results obtained under the Coastal Processes Monitoring and Management Plan.	Overall	For life of Project.	Completed	Ownership of the Port Facilities and the Coastal Processes Monitoring and Management Plan (CPMMP) has been transferred to the Pilbara Ports Authority (PPA). PPA implements the CPMMP in accordance with the requirements of MS 1131, which was approved by the WA Minister for Environment on 22 April 2020.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<p>iv. maintain the functionality of the Ashburton delta and avoid destabilisation of the chenier that impounds the coastal lagoon east of Entrance Point;</p> <p>v. minimise the impacts on the recreational value of beaches between the nearshore marine facilities and Beadon Creek;</p> <p>vi. minimise the reduction in the integrity and performance of the Onslow seawall; and</p> <p>vii. minimise the reduction in the integrity and values of heritage sites between the Ashburton Delta and Beadon Creek.</p>						
873:M9.2 (effective until 22 April 2020)	Coastal Processes	<p>Prior to construction of the nearshore marine facilities (as defined in Schedule 1), unless otherwise approved by the CEO, the Proponent shall develop a Coastal Processes Monitoring and Management Plan to be approved by the CEO. The plan shall include:</p> <p>i. site inspection of beach, entrance bar and seawall condition between the Ashburton Delta and Beadon Creek;</p> <p>ii. beach, chenier and spit/entrance bar width using a combination of topographic surveys and aerial photography/satellite imagery;</p> <p>iii. beach profile using on-ground photography;</p> <p>iv. mangrove habitat monitoring;</p> <p>v. hydrographic survey of the near-shore area;</p> <p>vi. community liaison strategy to obtain feedback on impacts on recreational values; and</p> <p>vii. site inspection of heritage locations to assess the condition and potential threats to European heritage locations;</p> <p>viii. a table showing the type of monitoring and monitoring frequency for each of the coastal features to be protected under condition 9.1;</p> <p>ix. management triggers relevant to achieving the outcomes specified in condition 9.1;</p> <p>x. management actions that will be implemented in the event that management triggers are likely to be exceeded.</p>	<p>Prepare Coastal Processes Monitoring and Management Plan.</p> <p>Approval of the Coastal Processes Monitoring and Management Plan by the CEO (OEPA).</p>	<p>Records demonstrating CEO (OEPA) approval of the Coastal Processes Monitoring and Management Plan.</p> <p>If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M9.2.</p>	Pre-construction	Prior to the construction of the nearshore marine facilities (as defined in Schedule 1).	Completed	<p>CPMMP Revision 2 (WS0-0000-HES-PLN-CVX-000-00070-000).</p> <p>Submission letter from CAPL to OEPA, 4 December 2012 (WS0-0000-HES-LET-CVX-EPA-00090).</p> <p>Approval letter from OEPA to CAPL, 18 December 2012 (WS0-0000-HES-LET-EPA-CVX-00073).</p>
873:M9.3A (effective until 22 April 2020)	Coastal Processes	<p>The Proponent shall provide relevant stakeholders with a draft copy of the Coastal Processes Monitoring and Management Plan required under condition 9.2 and provide those stakeholders a reasonable opportunity to comment on the plan before it is submitted to the CEO for approval under condition 9.2.</p>	<p>Provide relevant stakeholders with a draft copy of the Coastal Processes Monitoring and Management Plan for comment prior to its submission for approval to the CEO (OEPA).</p>	<p>Records demonstrating the provision of the draft Coastal Processes Monitoring and Management Plan to relevant stakeholders allowing reasonable opportunity for comment prior to the submission of the Plan to the CEO (OEPA) for approval.</p>	Pre-construction	Prior to submission of the Coastal Processes Monitoring and Management Plan for approval to the CEO (OEPA). 873:M9.3 (effective until 22 April 2020)	Coastal Processes	The Proponent shall implement the approved Coastal Processes Monitoring and Management Plan required under condition 9.2.	Implement the approved Coastal Processes Monitoring and Management Plan.	Records demonstrating the implementation of the approved Coastal Processes Monitoring and Management Plan.	Overall	For life of Project.	Completed	CPMMP Revision 3 (WS0-0000-HES-PLN-CVX-000-00070-000). Submission letter from CAPL to OEPA, 8 October 2015 (WS0-0000-HES-LET-CVX-EPA-00299). Approval letter from OEPA, 14 October 2015 (WS0-0000-HES-LET-EPA-CVX-00211). See 873:M9.1
873:M9.4 (effective until 22 April 2020)	Coastal Processes	The Proponent shall report any non achievement of the management trigger referred to in condition 9.2, along with measures taken and/or proposed to be taken, and strategies to be implemented in response to the non achievement, to the CEO within 21 days of the non achievement being identified.	Report non-achievement to the CEO (OEPA) along with measures taken and/or proposed to be taken, and strategies to be implemented in response to the non-achievement.	Records demonstrating reporting to the CEO (OEPA).	Overall	Reporting within 21 days of the non achievement being identified as required by 873:M9.4.	Compliant	See 873:M9.1
873:M9.5 (effective until 22 April 2020)	Coastal Processes	The Proponent shall make the Plan required under condition 9.2 publicly available in a manner approved by the CEO.	Make the Coastal Processes Monitoring and Management Plan publicly available in a manner approved by the CEO (OEPA).	Records demonstrating that the Coastal Processes Monitoring and Management Plan was made publicly available in a manner approved by the CEO (OEPA).	Overall	Within one month of the Coastal Processes Monitoring and Management Plan being approved by the CEO (OEPA).	Compliant	The approved CPMMP (WS0-0000-HES-PLN-CVX-000-00070-000) was made publicly available on CAPL's website: https://australia.chevron.com/our-businesses/wheatstone-project/environmental-approvals See 873:M9.1
873:M10.1	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall engage dedicated Marine Fauna Observers who must: i. demonstrate a knowledge of marine wildlife species in the Pilbara region, including Threatened and Migratory Species listed under the Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act), and their behaviours; ii. be on duty on vessels actively engaged in pile-driving and/or dredging during all daylight hours when pile-driving operations and/or dredging are conducted; and iii. maintain a log of: a. their observations of cetaceans in a format consistent with the National Cetacean Sightings and Strandings Database; b. their observations of other marine fauna, including injured or dead fauna within 500 metres of the vessels referred to in condition 10.1 (ii); c. their observations of fauna behaviours, in particular any behaviours that could be interpreted as a display of disturbance or distress; d. management responses by the Proponent in relation to observation of disturbed or distressed fauna, and injured or dead fauna; and e. observation hours and in relation to the duration of the pile driving and dredge activity.	Engage dedicated Marine Fauna Observers. Marine Fauna Observers to maintain logs.	Logs maintained by engaged Marine Fauna Observers.	Construction Overall	When vessels are actively engaged in pile-driving and/or dredging during all daylight hours when pile-driving operations and/or dredging are conducted.	Completed	Nearshore/offshore construction works were completed in 2017. Dedicated Marine Fauna Observers (MFOs) were on duty during daylight hours on vessels actively engaged in pile-driving and/or dredging activities and maintained marine fauna observations logs as required by this condition. Wheatstone Project – Monthly Records from MFOs (WS0-0000-HES-REC-CVX-000-00189-000). See 873:M10.3.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
873:M10.2	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall within six months of completing pile driving operations, lodge cetacean records with the National Cetacean Sighting and Strandings Database at the Australian Antarctic Division and with DEC and OEPA.	Lodge cetacean records with National Cetacean Sighting and Strandings Database at the Australian Antarctic Division and with DEC and OEPA within six months of completion of pile-driving operations.	Records demonstrating lodgement of cetacean records with National Cetacean Sighting and Strandings Database at the Australian Antarctic Division and with DEC and OEPA.	Construction	Lodgement within 6 months of completing pile-driving operations.	Completed	Pile-driving operations were completed in December 2015. Wheatstone Project Monthly Records from MFOs (WS0-0000-HES-REC-CVX-000-00189-000). Submission letter from CAPL to the Australian Antarctic Division, DPaW and OEPA, 20 April 2016 (WS0-0000-HES-LET-CVX-AAR-00002).
873:M10.3	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	At least one member of the crew on each vessel undertaking construction activities will be trained in marine fauna observations and mitigation measures, including the requirements of the Wildlife Conservation (Closed Season for Marine Mammals) Notice 1998, as amended or replaced from time to time, and maintain a log of fauna observed during transit and construction activity consisting of: GPS coordinates; species (if known); and behaviour. Logs are to be submitted to the DEC on an annual basis at the same time as submitting the compliance assessment report required by condition 4.6 to the CEO.	Train crew on vessels engaged in construction activities to requirements of 873:M10.3. Ensure relevant crew members maintain log in accordance with 873:M10.3. Submit logs to DEC.	Records demonstrating relevant crew on vessels engaged in construction activities to requirements of 873:M10.3. Logs of fauna observed during transit and construction activities. Records demonstrating submission of logs to DEC.	Construction	Logs are to be kept when vessels are undertaking construction and transit activities. Logs are to be submitted on an annual basis at the same time as submitting the annual compliance assessment report required by 873:M4.6.	Completed	Nearshore/offshore construction works were completed in 2017. Vessels undertaking construction activities complied with the requirements of this condition, noting the following resolved instances of potential non-compliance: Notification letter from CAPL to OEPA, 24 July 2013 (WS0-0000-HES-LET-CVX-EPA-00140). Letter from OEPA, 5 August 2013, confirming non-compliance is resolved (WS0-0000-HES-LET-EPA-CVX-00137). Notification letter from CAPL to OEPA, 18 September 2013 (WS0-0000-HES-LET-CVX-EPA-00162). Letter from OEPA, 2 October 2013, confirming non-compliance is resolved (WS0-0000-HES-LET-EPA-CVX-00138). Wheatstone Project – Monthly Records from MFOs (WS0-0000-HES-REC-CVX-000-00189-000): Submission letter from CAPL to DPaW, 19 November 2013, Marine Fauna Logs for 25 March 2013–31 August 2013 (WS0-0000-HES-LET-CVX-DEC-00048). Submission letter from CAPL to DPaW, dated 18 November 2014, Marine Fauna Logs for 31 August 2013–30 August 2014 (WS0-0000-HES-LET-CVX-DEC-00060). Submission letter from CAPL to DPaW, 26 November 2015, Marine Fauna Logs for 31 August 2014–30 August 2015 (WS0-0000-HES-LET-CVX-DEC-00066). Submission letter from CAPL to DPaW, 15 November 2016, Marine Fauna Logs for 31 August 2015–30 August 2016 (WS0-0000-HES-LET-CVX-DEC-00073). Submission letter from CAPL to DBCA, 8 November 2017, Marine Fauna Logs for 31 August 2016–30 August 2017 (WS0-0000-HES-LET-CVX-DEC-00080).
873:M10.4	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation	Vessels engaged in construction of the nearshore or offshore marine facilities or trunkline shall not exceed those speeds specified in the Conservation Significant Marine Fauna Interaction Management Plan required under condition 10.11 or a speed designated by the Department of	Implement approved Conservation Significant Marine Fauna Interaction Management Plan to lodge cetacean records.	Records demonstrating implementation of approved Conservation Significant Marine Fauna Interaction Management Plan. Speeds designated by Department of Transport or relevant Port Authority.	Construction	When vessels are engaged in the construction of the nearshore or offshore marine facilities or trunkline.	Completed	Nearshore/offshore construction works were completed in 2017. Vessels engaged in constructing nearshore or offshore marine facilities or trunkline complied with the requirements of this condition, noting the following resolved instances of potential non-compliance:

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
	Vessel and Onshore Facility light sources	Transport or relevant Port Authority, whichever is lesser.						Notification letter from CAPL to OEPA, 15 May 2013 (WS0-0000-HES-LET-CVX-EPA-00126). Letter from OEPA, 27 September 2013, confirming non-compliance is resolved (WS0-0000-HES-LET-EPA-CVX-00121). Notification letter from CAPL to OEPA, 4 June 2013 (WS0-0000-HES-LET-CVX-EPA-00131). Letter from OEPA, 27 September 2013, confirming non-compliance is resolved (WS0-0000-HES-LET-EPA-CVX-00122). Notification letter from CAPL to OEPA, 12 April 2017 (WS0-0000-HES-LET-CVX-EPA-00337). Letter from OEPA, 31 May 2017, confirming non-compliance is resolved (WS0-0000-HES-LET-EPA-CVX-00244).
873:M10.5	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	Subject to condition 10.9, no marine pile driving operations shall commence until the Marine Fauna Observer (or observers) required by condition 10.1 have verified that no cetacean(s) or dugong(s) have been observed within a radius of 1,500 metres or marine turtle(s) within a radius of 300 metres from the planned piling operation during the 30 minute period immediately prior to commencement of piling operations.	Implement approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating implementation of approved Conservation Significant Marine Fauna Interaction Management Plan.	Construction Overall	For 30 minutes immediately prior to the commencement of piling operations.	Completed	Pile-driving operations were completed in December 2015. The requirements of this condition were met, and no instances of potential non-compliance were identified during these operations.
873:M10.6	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	Prior to commencement of full power marine pile driving, the Proponent shall implement soft start-up procedures that slowly increase the intensity of noise emissions over a period of no less than 15 minutes.	Implement approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating implementation of approved Conservation Significant Marine Fauna Interaction Management Plan.	Construction Overall	Prior to commencement of full power marine pile driving.	Completed	Pile-driving operations were completed in December 2015. The requirements of this condition were met, and no instances of potential non-compliance were identified during these operations.
873:M10.7	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	If the Marine Fauna Observer(s) required by condition 10.1, or any other person, observes a marine turtle enter within 100 metres of a piling operation, or cetacean or dugong within 500 metres of each piling operation, the piling operation within 100 metres of a marine turtle or 500 metres of the cetacean or dugong is to be suspended.	Implement approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating implementation of approved Conservation Significant Marine Fauna Interaction Management Plan.	Construction Overall	During piling operations.	Completed	Pile-driving operations were completed in December 2015. The requirements of this condition were met, and no instances of potential non-compliance were identified during these operations.
873:M10.8	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine	Marine pile driving that has been suspended in accordance with condition 10.7 shall not recommence until the cetacean or dugong has moved beyond 1,500 metres from the suspended piling	Implement approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating implementation of approved Conservation Significant Marine Fauna Interaction Management Plan.	Construction Overall	Once a piling operation has been suspended and until it is able to be recommenced in	Completed	Pile-driving operations were completed in December 2015. The requirements of this condition were met, and no instances of potential non-compliance were identified during these operations.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
	Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	operation or the marine turtle beyond 300 metres or the cetacean, dugong or marine turtle has not been observed within the exclusion zone for a period of 30 minutes. Marine pile driving that has been suspended for more than 15 minutes shall recommence with soft start-up procedures as required by condition 10.6.				accordance with procedures required by 873:M10.6 if required.		
873:M10.9	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	No marine pile-driving operations shall occur between the hours of sunset and sunrise during the peak southern migration of mother and calf humpback whale pods defined as 10 August to 10 October in any year.	Implement approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating implementation of approved Conservation Significant Marine Fauna Interaction Management Plan.	Construction Overall	No piling between the hours of sunset and sunrise between 10 August to 10 October in any year.	Completed	Pile-driving operations were completed in December 2015. The requirements of this condition were met, and no instances of potential non-compliance were identified during these operations.
873:M10.10	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	Marine pile driving commenced prior to sunset can continue between the hours of sunset and sunrise, unless marine pile driving is suspended for more than 15 minutes.	Implement approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating implementation of approved Conservation Significant Marine Fauna Interaction Management Plan.	Construction Overall	Between the hours of sunset and sunrise outside of the period 10 August to 10 October in any year.	Completed	Pile-driving operations were completed in December 2015. The requirements of this condition were met, and no instances of potential non-compliance were identified during these operations.
873:M10.11	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	<p>Prior to the commencement of construction of nearshore and offshore marine facilities, trunkline and onshore facilities, unless otherwise approved by the CEO, the Proponent shall prepare a Conservation Significant Marine Fauna Interaction Management Plan in consultation with the DEC and Commonwealth Department of Sustainability, Environment, Water, Population and Communities, which is to be approved by the CEO.</p> <p>The objective of this Conservation Significant Marine Fauna Interaction Management Plan is to ensure that the Proponent constructs and operates the nearshore and offshore marine facilities, trunkline and Onshore Facility so as to:</p> <ol style="list-style-type: none"> i. detect; and ii. avoid, or where this is not practicable, mitigate, <p>impacts upon conservation significant marine fauna, from construction and operation of nearshore and offshore marine facilities, trunkline and onshore facilities, including impacts from vessels.</p> <p>Note: For the purposes of this condition the term 'conservation significant marine fauna' includes marine mammals, marine turtles, whale sharks and sawfish.</p>	<p>Prepare a Conservation Significant Marine Fauna Interaction Management Plan in consultation with the DEC and SEWPaC.</p> <p>Approval of the Conservation Significant Marine Fauna Interaction Management Plan by the CEO (OEPA).</p>	<p>Records demonstrating consultation with the DEC and Commonwealth Department of Sustainability, Environment, Water, Population and Communities.</p> <p>Records demonstrating CEO (OEPA) approval of the Conservation Significant Marine Fauna Interaction Management Plan.</p> <p>If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M10.11.</p>	Pre-construction	Prior to the commencement of construction of nearshore and offshore marine facilities, trunkline and onshore facilities unless otherwise approved by the CEO. 873:M10.12A	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall provide relevant stakeholders with a draft copy of the Conservation Significant Marine Fauna Interaction Management Plan required under condition 10.11 and provide those stakeholders a reasonable opportunity to comment on the plan before it is submitted to the CEO for approval under condition 10.11.	Provide relevant stakeholders with a draft copy of the Conservation Significant Marine Fauna Interaction Management Plan for comment prior to its submission for approval to the CEO (OEPA).	Records demonstrating the provision of the draft Conservation Significant Marine Fauna Interaction Management Plan to relevant stakeholders allowing reasonable opportunity for comment prior to the submission of the Plan to the CEO (OEPA) for approval.	Pre-construction	Prior to submission of the Conservation Significant Marine Fauna Interaction Management Plan for approval to the CEO (OEPA).	Completed	Submission letter from CAPL to the Wilderness Society Australia, 13 December 2011 (WS0-0000-HES-LET-CVX-GXC-00066). Submission letter from CAPL to CCG, 13 December 2011 (WS0-0000-HES-LET-CVX-GXC-00067).
873:M10.12	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall include the following in the Conservation Significant Marine Fauna Interaction Management Plan: i. a description of the environmental stressors relating to the construction and operation of nearshore and offshore marine facilities, trunkline and Onshore Facility which are likely to impact on marine fauna. (environmental stressors may include, but are not limited to, noise, vibration, light spill and glow, vessel strike, dredge entrainment, and changes to coastal processes with the potential to impact on important marine fauna habitats); ii. a description of design features and management actions which the Proponent will implement to avoid, or where this is not practicable, mitigate impacts of the environmental stressors relating to the construction and operation of nearshore and offshore marine facilities, trunkline and Onshore Facility on conservation significant marine fauna (for example, darkness strategies that avoid, or where this is not practicable, the impact of lights or light glow from the construction and operations of the Proposal, vessels and offshore accommodation vessel, interfering with female turtles and hatchlings); iii. environmental performance standards to determine whether the design features and management actions are achieving the plan objectives referred to in condition 10.11; and iv. a process (including a monitoring programme) to determine that the environmental performance standards are being achieved.	Prepare a Conservation Significant Marine Fauna Interaction Management Plan.	Conservation Significant Marine Fauna Interaction Management Plan approved by the CEO (OEPA).	Pre-construction	Prior to the commencement of construction of nearshore and offshore marine facilities, trunkline and onshore facilities.	Completed	See 873:M10.11.
873:M10.13	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall implement the approved Conservation Significant Marine Fauna Interaction Management Plan required under conditions 10.11 and 10.12.	Implement the approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating the implementation of the Conservation Significant Marine Fauna Interaction Management Plan.	Overall	For life of Project.	Compliant	Conservation Significant Marine Fauna Interaction Management Plan Revision 7 (WS0-0000-HES-PLN-CVX-000-00037-000). Submission letter from CAPL to OEPA, 14 November 2016 (WS0-0000-HES-LET-CVX-EPA-00323). Approval letter from OEPA, 15 November 2016 (WS0-0000-HES-LET-EPA-CVX-00234). Addendum 1 to CSMFIMP Revision 7 (WS0-0000-HES-PLN-CVX-000-00130-000).

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
								Submission letter from CAPL to DWER, 14 September 2017 (WS0-0000-HES-LET-CVX-EPA-00348) for information. CSMFIMP Revision 7 (WS0-0000-HES-PLN-CVX-000-00037-000) was implemented during the reporting period. The objectives of the Plan were met. DWER completed an audit of implementation conditions of MS 873 (DWER Compliance Audit Report DWERA-000146) during the reporting period; no non-compliances were identified against the CSMFIMP.
873:M10.14	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall make the approved Conservation Significant Marine Fauna Interaction Management Plan required under conditions 10.11 and 10.12 publicly available in a manner approved by the CEO.	Make the Conservation Significant Marine Fauna Interaction Management Plan publicly available in a manner approved by the CEO (OEPA).	Records demonstrating that the Conservation Significant Marine Fauna Interaction Management Plan was made publicly available in a manner approved by the CEO (OEPA).	Overall	Within one month of approval of the Conservation Significant Marine Fauna Interaction Management Plan by the CEO (OEPA).	Compliant	The approved CSMFIMP (WS0-0000-HES-PLN-CVX-000-00037-000) was made publicly available on CAPL's website: https://australia.chevron.com/our-businesses/wheatstone-project/environmental-approvals
873:M10.15	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall review annually the approved Conservation Significant Marine Fauna Interaction Management Plan.	Annually review the approved Conservation Significant Marine Fauna Interaction Management Plan.	Records demonstrating the annual review of the approved Conservation Significant Marine Fauna Interaction Management Plan.	Overall	Annually.	Compliant	The annual review of the CSMFIMP was completed in March 2021.
873:M10.16	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall report to: i. the CEO any non-achievement of the environmental performance standards referred to in condition 10.12(iii) within 21 days of it having determined non-achievement and its recommendations as to how the plan should be amended to ensure standards are achieved; and ii. the DEC any natural or Proposal attributable injury or mortality of conservation significant marine fauna within 24 hours of the observation.	Report in accordance with requirements of 873:M10.16.	Records demonstrating reporting to the CEO (OEPA). Records demonstrating reporting to the DEC.	Construction Overall	Reporting as required by 873:M10.16(i) within 21 days of the non-achievement being identified. Reporting as required by 873:M10.16(ii) within 24 hours of any natural or Proposal-attributable injury or mortality of conservation significant marine fauna being observed.	Compliant	No non-achievements of the environmental performance standards referred to in Condition 10-12(iii) occurred during the reporting period. No Proposal-attributable injury or mortality of conservation-significant marine fauna occurred during the reporting period. All naturally occurring injury or mortality of conservation-significant marine fauna was reported within 24 hours of the observation.
873:M10.17	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	Prior to commencement of marine pile driving activities, unless otherwise approved by the CEO, the Proponent shall prepare, with the advice of an expert(s) in the field of noise propagation modelling in the marine environment, an Underwater Noise Monitoring and Review Program for the marine pile driving activities, to be approved by the CEO, which:	Prepare an Underwater Noise Monitoring and Review Program. Approval of the Underwater Noise Monitoring and Review Program by the CEO (OEPA).	Records demonstrating advice from an expert(s) in the field of noise propagation modelling in the marine environment. Records demonstrating CEO (OEPA) approval of the Underwater Noise Monitoring and Review Program. If applicable, CEO (OEPA) approval to take actions	Pre-construction	Prior to the commencement of marine pile-driving activities, unless otherwise approved by the CEO (OEPA).	Completed	Underwater Noise Monitoring and Review Program (UNMRP) Revision 0 (WS0-0000-HES-RPT-CVX-000-00113-000). Submission letter from CAPL to OEPA, 17 October 2012, including advice from an expert in the field of noise propagation modelling in the marine environment (WS0-0000-HES-LET-CVX-EPA-00078). UNMRP Revision 1 (WS0-0000-HES-RPT-CVX-000-00113-000).

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<p>i. measures underwater noise from pile driving operations to establish a library of sound signals:</p> <ul style="list-style-type: none"> a. at varying distances from the noise source; b. when driving piles of different sizes and types; c. during the concurrent piling of different numbers of piles; d. in conditions of different water depths; and e. in different driving conditions (substrate types); and <p>ii. reviews the predictive capacity of the noise propagation model used for the pile driving and make recommendations for improving the accuracy of underwater noise modelling in the future.</p>		otherwise than in accordance with 873:M10.17.				Submission letter from CAPL to OEPA, 5 June 2013 (WS0-0000-HES-LET-CVX-EPA-00130). Approval letter from OEPA, 17 June 2013 (WS0-0000-HES-LET-EPA-CVX-00104).
873:M10.18	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The Proponent shall implement the approved Underwater Noise Monitoring and Review Program required under condition 10.17.	Implement the approved Underwater Noise Monitoring and Review Program.	Records demonstrating implementation of the Underwater Noise Monitoring and Review Program.	Construction	During marine pile-driving activities.	Completed	Pile-driving operations were completed in December 2015. The UNMRP (WS0-0000-HES-RPT-CVX-000-00113-000) was implemented and the objectives of the Program were met during the pile-driving operations. No instances of potential non-conformances were identified.
873:M10.19	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels, Offshore Accommodation Vessel and Onshore Facility light sources	The results of the approved Underwater Noise Monitoring and Review Program are to be published within one year after the completion of the pile driving operations in a manner approved by the CEO.	Publish the results of the approved Underwater Noise Monitoring and Review Program.	Records demonstrating that the Underwater Noise Monitoring and Review Program was published within one year after the completion of the pile-driving operations in a manner approved by the CEO (OEPA).	Overall	Within one year after the completion of the pile-driving operations.	Completed	The results of the approved UNMRP were made publicly available on 7 July 2016 on CAPL's website: https://australia.chevron.com/our-businesses/wheatstone-project/environmental-approvals
873:M11.1	Marine Drilling and Blasting Activities	Prior to commencing marine drilling and blasting activities which are part of the construction of the nearshore or offshore marine facilities and trunkline, unless otherwise approved by the CEO, the Proponent shall prepare a Drilling and Blasting Management Plan to be approved by the CEO.	Prepare Drilling and Blasting Management Plan. Approval of the Drilling and Blasting Management Plan by the CEO (OEPA).	Records demonstrating CEO (OEPA) approval of the Drilling and Blasting Management Plan. If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M11.1.	Pre-construction	Prior to the commencement of marine drilling and blasting activities which are part of the construction of the nearshore or offshore marine facilities and trunkline, unless otherwise approved by the CEO (OEPA).	Completed	Construction works were completed in 2017. No marine drilling and blasting activities occurred during construction.
873:M11.2	Marine Drilling and Blasting Activities	The objectives of the Drilling and Blasting Management Plan are to ensure that drilling and blasting activities which are part of the construction of the nearshore or offshore marine facilities and trunkline are managed to minimise adverse impacts on all marine fauna. The Drilling and Blasting Management Plan shall include:	Prepare a Drilling and Blasting Management Plan.	Drilling and Blasting Management Plan approved by the CEO (OEPA).	Pre-construction	Prior to the commencement of marine drilling and blasting activities which are part of the construction of the nearshore or offshore	Completed	See 873:M11.1.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<p>i. a description of geographical location and duration of drilling and blasting required;</p> <p>ii. a description of likely blast pressures and potential environmental impacts of these pressures;</p> <p>iii. management actions to minimise environmental impacts, including:</p> <p>a. actions for the disposal of drilling muds;</p> <p>b. requirements for a dedicated Marine Fauna Observers for drilling and blasting operations as described in Condition 10 for other marine operations under 10.1, 10.2, 10.3, 10.5, 10.7 and 10.8;</p> <p>c. No night-time blasting during the peak nesting/hatching seasons for marine turtles, and the northern and southern migration of mother and calf humpback whales, as determined in consultation with the Department of Environment and Conservation; and</p> <p>d. Where practicable, marine blasting should be timed to avoid the peak nesting/hatching seasons for marine turtles, and the northern and southern migration of mother and calf humpback whales, as determined in consultation with the Department of Environment and Conservation</p> <p>iv. management actions for dead and injured marine fauna;</p> <p>v. stakeholder communication; and</p> <p>vi. reporting procedures and time frames.</p>				marine facilities and trunkline.		
873:M11.3A	Marine Drilling and Blasting Activities	The Proponent shall provide relevant stakeholders with a draft copy of the Drilling and Blasting Management Plan required under condition 11.1 and provide those stakeholders a reasonable opportunity to comment on the plan before it is submitted to the CEO for approval under condition 11.1.	Provide relevant stakeholders with a draft copy of the Drilling and Blasting Management Plan for comment prior to its submission for approval to the CEO (OEPA).	Records demonstrating the provision of the draft Drilling and Blasting Management Plan to relevant stakeholders with reasonable opportunity to comment prior to the submission of the Plan to the CEO (OEPA) for approval.	Pre-construction	Prior to submission of the Drilling and Blasting Management Plan for approval to the CEO (OEPA).	Completed	See 873:M11.1.
873:M11.3	Marine Drilling and Blasting Activities	In the event that marine drilling and blasting is required, the Proponent shall implement the approved Drilling and Blasting Management Plan required under conditions 11.1 and 11.2.	Implement the approved Drilling and Blasting Management Plan.	Records demonstrating implementation of the approved Drilling and Blasting Management Plan.	Construction	During any marine drilling and blasting that is required.	Completed	See 873:M11.1.
873:M11.4	Marine Drilling and Blasting Activities	The Proponent shall make the approved Drilling and Blasting Management Plan publicly available in a manner approved by the CEO.	Make the Drilling and Blasting Management Plan publicly available in a manner approved by the CEO (OEPA).	Records demonstrating that the approved Drilling and Blasting Management Plan was made publicly available in a manner approved by the CEO (OEPA).	Overall	Within one month of approval of the Drilling and Blasting Management Plan by the CEO (OEPA).	Completed	See 873:M11.1.
873:M12.1 (effective until 22 April 2020)	Introduced Marine Pests	The Proponent shall manage non-trading vessel activities and immersible equipment activities whilst engaged for the implementation of the Proposal with the objective of preventing the introduction of marine pests into State waters. For the	Manage non-trading vessel activities and immersible equipment activities engaged for the Proposal with the objective of preventing the introduction of marine pests	Records demonstrating the management of non-trading vessel and immersible equipment activities is being managed in accordance with	Overall	For life of Project.	Completed	Ownership of the Port Facilities has been transferred to the PPA. The requirements of Conditions 12-1 to 12-8 are now addressed by PPA in accordance with the requirements of MS 1131, which was approved by the WA Minister for Environment on 22 April 2020.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		purpose of this condition, Introduced Marine Pests are those species known to be introduced marine pests, or any other species demonstrating invasive characteristics.	into western Australian waters.	the requirements of 873:M12.2 to 873:M12.8.				
873:M12.2 (effective until 22 April 2020)	Introduced Marine Pests	Prior to the departure of any non-trading vessels and associated immersible equipment engaged for the implementation of the Proposal (including dredges and pile driving barges), from any port into State waters, the Proponent shall: i. undertake a risk assessment for Introduced Marine Pests. The risk assessment will be undertaken in accordance with a risk assessment procedure approved by Department of Fisheries; and ii. submit the risk assessment, including all inputted data and results to the Department of Fisheries for a determination of the risk level (high, or low) to be assigned to the vessels or associated immersible equipment.	Prior to the departure of any non-trading vessel and associated immersible equipment engaged for the implementation of the Proposal from any port into State waters, undertake a risk assessment for Introduced Marine Pests in accordance with a risk assessment procedure approved by the Department of Fisheries. Submit the risk assessment, including all inputted data and results, to the Department of Fisheries for a determination of the risk level.	Records of the risk assessment procedure approved by Department of Fisheries. Copies of risk assessment(s) for Introduced Marine Pests. Records demonstrating submission of the risk assessment(s) for Introduced Marine Pests to the Department of Fisheries.	Overall	Prior to the departure of any non-trading vessels and associated immersible equipment engaged for the implementation of the Proposal from any port into State waters.	Completed	See 873:M12-1.
873:M12.3 (effective until 22 April 2020)	Introduced Marine Pests	The proponent shall ensure that any non-trading vessel or immersible equipment assessed in accordance with conditions 12.2(i) and (ii) and determined by the Department of Fisheries to be of high risk of Introducing Marine Pests, do not enter State waters unless and until: i. the non-trading vessel or immersible equipment has been inspected by an Officer of the Department of Fisheries, or a suitably qualified invasive marine pest expert approved by the Department of Fisheries; and ii. the proponent has provided evidence to the Department of Fisheries, certifying that: a. there is no sediment on or within the non-trading vessel and immersible equipment; b. ballast water (if any) has been, or will be, managed according to the Australian Quarantine and Inspection Service ballast water requirements as amended or replaced from time to time; c. no Introduced Marine Pests have been identified on or within any vessel or immersible equipment inspected or; d. where an Introduced Marine Pest has been identified on or within any vessel or immersible equipment then; 1. the vessel has been subsequently cleaned and the cleaned vessel has been inspected by an Officer of the Department of Fisheries or a suitably qualified invasive marine pest expert approved by the Department of Fisheries,	Implement procedure designed to ensure procedures set out in 873:M12.3 are followed.	Records of when vessels entered State waters. Records of inspections. Records of material given to Department of Fisheries.	Overall	Prior to any non-trading vessel or immersible equipment assessed in accordance with 873:M12.2(i) and (ii) and determined by the Department of Fisheries to be of high risk of Introducing Marine Pests entering State waters, or if 873:M12.3(iv) applies, within 48 hours of the vessel arriving in State waters.	Completed	See 873:M12-1.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<p>2. any cleaning or treatment activities undertaken to address Introduced Marine Pests risk, has been undertaken to an extent that the non-trading vessel or associated immersible equipment is determined by the Department of Fisheries to represent a low risk to the West Australian marine environment; and</p> <p>iii. vessel and immersible equipment inspections have been conducted no more than 7 days prior to vessel or immersible equipment departure for Ashburton North; or</p> <p>iv. If a vessel is determined by DoF to be of a high risk and has entered State waters, without meeting the requirements of conditions 12.3 (i), (ii) and (iii), then it must be inspected within 48 hours of arrival in State waters by an Officer of the Department of Fisheries or a suitably qualified invasive marine pest expert approved by the Department of Fisheries.</p> <p>Note: Arrangements for inspection within the Port of Onslow shall be carried out in consultation with the Harbour Master.</p>						
873:M12.4 (effective until 22 April 2020)	Introduced Marine Pests	<p>If non-trading vessels and associated immersible equipment are to be transferred without exemption (condition 12.5) from Ashburton North to other locations within State waters, the Proponent shall, at least 14 days prior to departure from Port of Onslow, undertake an inspection or submit a demobilisation risk assessment report to the Department of Fisheries that is informed by the Introduced Marine Pests monitoring of Ashburton North. Introduced Marine Pests monitoring shall:</p> <p>i. be consistent with monitoring design, implementation and reporting standards set out as part of the National Monitoring Network for the Prevention and Management of Marine Pest Incursions, as approved by the Monitoring Design Assessment Panel of the Marine Pest Sectoral Committee (MPSC), or as otherwise approved by the Department of Fisheries.</p> <p>ii. include a review of target priority Introduced Marine Pest species prior to each monitoring survey;</p> <p>iii. include a range of sample sites focusing on habitats considered most capable of facilitating the establishment of priority target species throughout all areas of port activities including anchorages, wharves, jetties, slipways, harbours and natural substrates, within the waters of the marine leases held by the Proponent;</p> <p>iv. be undertaken a minimum of once each year for the life of the Proposal; and</p>	<p>Undertake an inspection or submit a demobilisation risk assessment report to the Department of Fisheries.</p> <p>Conduct Introduced Marine Pests monitoring.</p>	<p>Records of inspection(s) and/or demobilisation risk assessment report(s).</p> <p>Records of Introduced Marine Pests monitoring.</p>	Overall	At least 14 days prior to departure of non-trading vessels and associated immersible equipment from Port of Onslow to other locations within State waters.	Completed	See 873:M12-1.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		v. include suitable targeted sampling and analysis of specimens removed during port and vessel maintenance activities.						
873:M12.5 (effective until 22 April 2020)	Introduced Marine Pests	Specified vessels and immersible equipment and vessels used to undertake single or multiple bunkering or other routine operational activities at neighbouring ports such as Exmouth, Dampier and Port Hedland will be exempt from the Introduced Marine Pests risk mitigation measures referred to in condition 12.4 if, prior to arriving or departing from Port of Onslow, the Department of Fisheries, has issued a written exemption for that specified vessel and immersible equipment to enter and or leave Port of Onslow prior to an identified date, based on comprehensive information submitted by the Proponent that includes a risk assessment supported by documentation demonstrating biofouling management actions and a vessel activity profile since the most recent dry-dock cleaning.	Submit a risk assessment supported by documentation demonstrating biofouling management actions and a vessel activity profile since the most recent dry-dock cleaning to the Department of Fisheries.	Records of information provided to the Department of Fisheries, which shall include a risk assessment supported by documentation demonstrating biofouling management actions and a vessel activity profile since the most recent dry-dock cleaning. Records of a written exemption issued by the Department of Fisheries for specified vessel and immersible equipment to enter and or leave Port of Onslow prior to an identified date.	Overall	Prior to the specified vessels and immersible equipment, and vessels used to undertake single or multiple bunkering or other routine operational activities at neighbouring ports such as Exmouth, Dampier and Port Hedland arriving or departing from Port of Onslow.	Completed	See 873:M12-1.
873:M12.6 (effective until 22 April 2020)	Introduced Marine Pests	The Proponent shall, throughout the life of the Proposal notify the Department of Fisheries, the Port of Onslow Harbour Master and the CEO of any known or suspected Introduced Marine Pests detected in the waters within the marine leases held by the Proponent at or adjacent to Ashburton North within 24 hours following detection, or following subsequent sample analysis undertaken as part of inspection or monitoring activities.	Notify the Department of Fisheries (DoF), the Port of Onslow Harbour Master, and the CEO (OEPA).	Records demonstrating the notification of any known or suspected Introduced Marine Pests detected in the waters within the Project's marine leases at or adjacent to Ashburton North was submitted to the DoF, the Port of Onslow Harbour Master and the CEO (OEPA) within 24 hours following detection, or following subsequent sample analysis undertaken as part of inspection or monitoring activities.	Overall	For life of project, within 24 hours following detection, or following subsequent sample analysis undertaken as part of inspection or monitoring activities.	Completed	See 873:M12-1.
873:M12.7 (effective until 22 April 2020)	Introduced Marine Pests	In the event that Introduced Marine Pests are detected during either the inspection of non-trading vessels and immersible equipment required by condition 12.3, or during monitoring surveys required by condition 12.4, and the introduction is a result of proposal related activities, the Proponent shall, in consultation with the Department of Fisheries and the CEO, develop and implement an Introduced Marine Pests Management Strategy to prevent wherever practicable, the establishment and proliferation of that organism, aiming to control and potentially eradicating that organism, and to minimise the risk of that organism being transferred to other locations within Western Australia.	If Introduced Marine Pests are detected during activities carried out under 873:M12.3 or 873:M12.4 and the introduction relates to Proposal-related activities, develop and implement an Introduced Marine Pests Management Strategy in consultation with the Department of Fisheries and the CEO (OEPA).	Records demonstrating implementation of the Introduced Marine Pests Management Strategy in consultation with the Department of Fisheries and the CEO (OEPA). Copy of Introduced Marine Pests Management Strategy. Copy of records demonstrating consultation with the Department of Fisheries and the CEO (OEPA).	Overall	In the event that introduced Marine Pests are detected during either the inspection of non-trading vessels and immersible equipment required by 873:12.3, or during monitoring surveys required by 873:12.4.	Completed	See 873:M12-1.
873:M12.8 (effective until 22 April 2020)	Introduced Marine Pests	The Proponent is to submit a report detailing the outcomes of the implementation of the Introduced Marine Pests Management Strategy to the Department of Fisheries and the CEO within a month of the commencement of	Submit a report detailing the outcomes of the implementation of the Introduced Marine Pests Management Strategy to the	Report(s) detailing the outcomes of the implementation of the Introduced Marine Pests Management Strategy within a month of the commencement	Overall	Within one month of the commencement of the implementation of the Introduced Marine Pests Management Strategy	Completed	See 873:M12-1.

		the implementation of the Introduced Marine Pests Management Strategy and thereafter as required by the CEO.	Department of Fisheries and the CEO (OEPA).	of the implementation of the Introduced Marine Pests Management Strategy and thereafter as required by the CEO (OEPA). Records demonstrating submission of the report to the CEO (OEPA).		and thereafter as required by the CEO (OEPA).		
873:M13.1	Marine Outfalls	Prior to construction of any infrastructure for this Proposal related to waste water discharge, and prior to application for any works approval from DEC for any discharge, unless otherwise approved by the CEO, the Proponent must prepare a map to be approved by the CEO that spatially defines the areas where each environmental quality objective and level of ecological protection is to be achieved in the marine environment surrounding this Proposal. The map shall be provided in a GIS compatible format specified by the CEO.	Prepare and submit a map to the CEO (OEPA) that spatially defines the areas where each environmental quality objective and level of ecological protection is to be achieved in the marine environment surrounding the Project. Provide map in GIS-compatible format specified by the CEO.	Records demonstrating the GIS-compatible format specified by the CEO (OEPA). Map required by 873:M13.1 including records of its submittal to the CEO(OEPA) for approval prior to construction of any infrastructure related to waste water discharge, and prior to application for any works approval from DEC for any discharge, unless otherwise approved by the CEO (OEPA). If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M13.1.	Pre-construction	Prior to construction of any infrastructure related to waste water discharge, and prior to application for any works approval from DEC for any discharge, unless otherwise approved by the CEO (OEPA).	Completed	Marine Outfalls Mapping (MOM) Revision 1 (WS0-0000-HES-PLN-CVX-000-00082-000). Submission letter from CAPL to OEPA, 7 December 2012 (WS0-0000-HES-LET-CVX-EPA-00092). Approval letter from OEPA, 24 January 2013 (WS0-0000-HES-LET-EPA-CVX-00079). MOM Revision 2 (WS0-0000-HES-PLN-CVX-000-00082-000). Submission letter from CAPL to OEPA, 31 January 2013 (WS0-0000-HES-LET-CVX-EPA-00103). Approval letter from OEPA, 25 February 2013 (WS0-0000-HES-LET-EPA-CVX-00088).
873:M13.2	Marine Outfalls	The Proponent must locate the co-mingled on-shore brine and waste water outfalls so that the associated Low Ecological Protection Area is entirely contained within the Moderate Ecological Protection Area of the port.	Locate the co-mingled on-shore brine and waste water outfalls in accordance with 873:M13.2.	Records demonstrating that the co-mingled on-shore brine and waste water outfalls were located so that the associated Low Ecological Protection Area is entirely contained within the Moderate Ecological Protection Area of the port map required by 873:13.1.	Construction	During the construction of co-mingled on-shore brine and waste water outfalls.	Completed	MOM Revision 2 (WS0-0000-HES-PLN-CVX-000-00082-000). See 873:M13.1.
873:M13.3	Marine Outfalls	The Moderate Ecological Protection Area for the port is defined as the area contained within 250 metres of the shipping berths and ship turning basin, and the area enclosed by the Marine Offloading Facility breakwaters. Outside of the Moderate Ecological Protection Area a high level of ecological protection shall be maintained.	Maintain a high level of ecological protection outside the Moderate Ecological Protection Area to address the second portion of the condition.	Map required by 873:M13.1.	Overall	For life of Project.	Compliant	MOM Revision 4 (WS0-0000-HES-PLN-CVX-000-00082-000). MIP Revision 5 (WS0-0000-HES-PLN-CVX-000-00089-000).
873:M13.4	Marine Outfalls	The Low Ecological Protection Area for the co-mingled on-shore brine and waste water outfalls must not extend beyond 70 metres from all points of the diffuser structure.	Map required by 873:M13.1. Manage the design and construction of diffuser structure such that the Low Ecological Protection Area for the co-mingled onshore brine and waste water outfalls do not extend beyond 70 metres from all points of the diffuser structure.	Map required by 873:M13.1.	Overall	For life of Project.	Compliant	MOM Revision 4 (WS0-0000-HES-PLN-CVX-000-00082-000). MIP Revision 5 (WS0-0000-HES-PLN-CVX-000-00089-000).
873:M13.5	Marine Outfalls	The Proponent must locate the produced water outfall beyond the 20 metre isobath at a location approved by the CEO.	Locate the produced water outfall beyond the 20 metre isobath at a location approved by the CEO.	Map required by 873:M13.1. Records demonstrating location of the produced water outfall at the location approved by the CEO.	Pre-construction	During construction and operation of any infrastructure related to produced water outfall.	Not required at this stage	Produced water outfall not required at this stage. No changes to marine infrastructure occurred during the reporting period.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
				Records demonstrating CEO (OEPA) approval of the spatial location of the produced water outfall.				
873:M13.6	Marine Outfalls	The Proponent shall incorporate waste treatment strategies and design the produced water outfall to minimise the size of any associated Low Ecological Protection Area and to ensure it does not extend beyond 70 metres from all points of the diffuser. Outside the Low Ecological Protection Area a high level of ecological protection shall be maintained.	Incorporate waste treatment strategies and design the produced water outfall to minimise the size of any associated Low Ecological Protection Area and to ensure it does not extend beyond 70 metres from all points of the diffuser. Maintain a high level of ecological protection outside the Low Ecological Protection Area.	Records demonstrating incorporation of waste treatment strategies and design of the produced water outfall to minimize the size of any associated Low Ecological Protection Area. Records demonstrating that the Low Ecological Protection Area does not extend beyond 70 metres from all points of the diffuser. Records demonstrating that outside the Low Ecological Protection Area, a high level of ecological protection was maintained.	Overall	For life of Project.	Not required at this stage	Produced water outfall not required at this stage. No changes to marine infrastructure occurred during the reporting period.
873:M13.7	Marine Outfalls	The Proponent shall ensure that all waste and produced water discharges are managed to achieve the environmental quality objectives and levels of ecological protection as identified through condition 13.1 and described in Schedule 2.	Ensure that all waste and produced water discharges are managed to achieve the environmental quality objectives and levels of ecological protection as identified through 873:M13.1 and described in Schedule 2.	Records demonstrating that all waste and produced water discharges were managed to achieve the environmental quality objectives and levels of ecological protection as identified through 873:M13.1 and described in Schedule 2.	Overall	For life of Project.	Compliant	Permanent Onshore Facilities Waste Water Discharge Plan (POFWWDP) Revision 6 (WS0-0000-HES-PLN-CVX-000-00102-000).
873:M13.8	Marine Outfalls	The Proponent shall not combine the brine discharge from the onboard desalination plant with the treated waste water discharge.	Ensure that brine discharge from the onboard desalination plant is not combined with the treated wastewater discharge	Records demonstrating that brine discharge from the onboard desalination plant was not combined with the treated wastewater discharge.	Overall	For life of Project.	Not required at this stage	No offshore accommodation vessels were used during the reporting period. See 873:M5.4.
873:M13.9	Marine Outfalls	The Proponent shall incorporate waste treatment strategies and design the discharge outlets for treated waste water, brine and generator cooling water so that the size of any associated Low Ecological Protection Area is minimised and does not extend beyond 70 metres from the Offshore Accommodation Vessel. Outside the Low Ecological Protection Area a high level of ecological protection shall be maintained.	Incorporate waste treatment strategies and design the discharge outlets for treated wastewater, brine, and generator cooling water so that the size of any associated Low Ecological Protection Area is minimised and does not extend beyond 70 metres from the Offshore Accommodation Vessel. Maintain a high level of ecological protection outside the Low Ecological Protection Area.	Records demonstrating that waste treatment strategies and the design of the discharge outlets for treated wastewater, brine, and generator cooling water meet the requirements of 873:M13.9. Records demonstrating that outside the Low Ecological Protection Area, a high level of ecological protection was maintained.	Overall	For life of Project.	Not required at this stage	See 873:M5.4.
873:M13.10	Marine Outfalls	The Proponent shall ensure that all discharges from the Offshore Accommodation Vessel are managed to achieve the environmental quality objectives and levels of ecological protection as described in Schedule 2.	Ensure that all discharges from the Offshore Accommodation Vessel are managed to achieve the environmental quality objectives and levels of ecological protection as described in Schedule 2.	Records demonstrating that all discharges from the Offshore Accommodation Vessel were managed to achieve the environmental quality objectives and levels of ecological protection as described in Schedule 2.	Construction	While the Offshore Accommodation Vessel is in the Project area.	Not required at this stage	See 873:M5.4.

Reporting to the DEC within 6 months of commissioning, including any additional treatment options or management actions necessary to ensure ongoing compliance with the environmental quality objectives and levels of ecological protection established through conditions 13.1 and 13.9 and described in Schedule 2.</p>	Develop a Discharge Quality Validation and Reporting Plan to the satisfaction of the DEC addressing the requirements of 873:M13.14.	Records demonstrating that the DEC was satisfied with the Discharge Quality Validation and Reporting Plan	Overall	Prior to submitting an application for a works approval to the DEC for the discharges from any Offshore Accommodation Vessels.	Not required at this stage	See 873:M5.4.
873:M13.15	Marine Outfalls	In the event that the monitoring required by conditions 13.12 and 13.14 or through the discharge licences issued under Part V of the Environmental Protection Act 1986 indicates that the environmental quality objectives and levels of ecological protection established through conditions 13.1 and 13.9, and described in Schedule 2, are not being met, or are not likely to be met, the Proponent shall report the findings to the CEO and the DEC as soon as practicable, but within five working days, along with a description of the management actions to be taken to meet the required level of environmental quality.	Report to the CEO (OEPA) and the DEC as required by 873:M13.15.	Report to the CEO (OEPA) and the DEC.	Construction	Within 5 working days of the environmental quality objectives and levels of ecological protection established through 873:M13.1 and 873:M13.9, and described in Schedule 2, not being met, or not likely to be met.	Not required at this stage	There were no instances to report during the reporting period. Letter from CAPL to DWER, 6 May 2020 about monitoring the marine outfall discharge confirmed that the outfall complies with the Environmental Quality Objectives and Levels of Ecological Protection as established in 873:M13.1 and Schedule 2 (ABU200500021).
873:M13.16	Marine Outfalls	Prior to the discharge of hydrostatic test fluids to marine waters, unless otherwise approved by the CEO, the Proponent is to develop, to the approval of the CEO, a Hydrostatic Test Fluids Discharge Management Plan that includes ecotoxicity testing of the hydrostatic test fluid, an assessment of likely impacts of the potential discharge against the environmental quality management framework outlined in Schedule 2 and management actions that will be implemented to ensure that the environmental quality objectives and levels of ecological protection are maintained, including monitoring and reporting frameworks.	Develop, to the approval of the CEO (OEPA), a Hydrostatic Test Fluids Discharge Management Plan that meets the requirements of 873:M13.16.	<p>Hydrostatic Test Fluids Discharge Management Plan approved by the CEO (OEPA).</p> <p>Records demonstrating that the Hydrostatic Test Fluids Discharge Management Plan was submitted to the CEO (OEPA) prior to the discharge of hydrostatic test fluids to marine waters.</p> <p>If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M13.16.</p>	Overall	Prior to the discharge of hydrostatic test fluids to marine waters, unless otherwise approved by the CEO (OEPA).	Not required at this stage	No discharge of hydrostatic test fluids to marine waters occurred during the reporting period.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
873:M13.17	Marine Outfalls	The Proponent must implement the Hydrostatic Test Fluids Discharge Management Plan required under condition 13.16 once approved by the CEO.	Implement the approved Hydrostatic Test Fluids Discharge Management Plan.	Hydrostatic Test Fluids Discharge Management Plan approved by the CEO (OEPA). Records demonstrating the implementation of the approved Hydrostatic Test Fluids Discharge Management Plan. Records demonstrating that the Hydrostatic Test Fluids Discharge Management Plan was approved by the CEO (OEPA).	Construction	Following the approval of the Hydrostatic Test Fluids Discharge Management Plan by the CEO (OEPA).	Not required at this stage	See 873:M13.16.
873:M14.1	Mangrove, Algal Mat and Tidal Creek Protection	The Proponent shall manage construction and operation activities to achieve the following outcomes as measured under the Mangrove, Algal Mat and Tidal Creek Protection Management Plan: i. not more than 5% long-term (greater than 5 years) loss of mangrove habitat in the Hooley Creek – Four Mile Creek mangrove system; ii. no long-term (greater than 5 years) net detectable loss of mangrove habitat in the Ashburton Delta mangrove system; and iii. no long-term (greater than 5 years) net detectable loss of algal mat habitat outside the Proposal footprint.	Implement the Mangrove, Algal Mat and Tidal Creek Protection Management Plan.	Records demonstrating implementation of approved Mangrove, Algal Mat and Tidal Creek Protection Management Plan.	Overall	For life of Project	Compliant	Mangrove Algal Mat, and Tidal Creek Protection Management Plan (MAMTCPMP) Revision 3 (WS0-0000-HES-PLN-CVX-000-00066-000). Submission letter from CAPL to OEPA, 16 February 2017 (WS0-0000-HES-LET-CVX-EPA-00329). Approval email from OEPA, 3 March 2017 (WS0-0000-HES-MEM-EPA-CVX-00011). The MAMTCPMP Revision 3 was implemented during the reporting period. The objectives of the Plan were met.
873:M14.2	Mangrove, Algal Mat and Tidal Creek Protection	Prior to construction of the MOF or ground disturbing activities that could potentially impact upon mangroves and algal mat habitats, unless otherwise approved by the CEO, the Proponent shall prepare a Mangrove Algal Mat and Tidal Creek Protection Management Plan to be approved by the CEO. The objective of the Mangrove Algal Mat and Tidal Creek Protection Management Plan is to minimise the impacts of construction and operation of the Proposal on mangroves, algal mats, juvenile turtle habitat and saw fish nursery habitat (tidal creeks and lagoon) between and including the Ashburton River Delta and Four Mile Creek. The Plan shall include the results of the additional saw fish survey referred to in the Wheatstone Environmental Review and Management Program (July 2010), and details of management, monitoring, triggers, contingencies and reporting in relation to: i. human impacts; ii. contaminated surface water runoff; iii. contaminated groundwater impacts; iv. changes in turbidity; v. changes in hydrological regime; vi. generation of acidity from potential acid sulphate soil disturbance; and	Prepare a Mangrove Algal Mat and Tidal Creek Protection Management Plan. Submit the Mangrove Algal Mat and Tidal Creek Protection Management Plan for approval to the CEO (OEPA).	Mangrove Algal Mat and Tidal Creek Protection Management Plan approved by the CEO (OEPA). If applicable, CEO (OEPA) approval to take actions otherwise than in accordance with 873:M14.2.	Pre-construction	Prior to construction of the MOF or ground-disturbing activities that could potentially impact upon mangroves and algal mat habitats, unless otherwise approved by the CEO.	Completed	MAMTCPMP Revision 0 (WS0-0000-HES-PLN-CVX-000-00066-000). Submission letter from CAPL to OEPA, 11 April 2012 (WS0-0000-HES-LET-CVX-EPA-00041). Approval letter from OEPA, 11 June 2012 (WS0-0000-HES-LET-EPA-CVX-00040).

873:M22.8	Residual Impacts and Risk Management Measures	The Proponent will fund DEC, on the basis described in Schedule 3 (Project F). The aim of the funding will be to assist DEC in the management of potential impacts and risks to the Cane River Conservation Park and proposed extensions associated with increased visitation from the Proposal.	Provide funding to the DEC, as described in Schedule 3 (Project F) of this Statement, with an aim as outlined in 873:M22.8.	Records demonstrating that funding was provided to the DEC, as described in Schedule 3 (Project F) of this Statement, with an aim as outlined in 873:M22.8.	Pre-construction	\$300 000 by 30 Jan 2012.	Completed	Project F payment occurred on 21 May 2012.
873:M22.9	Residual Impacts and Risk Management Measures	The Proponent will maintain a contingency fund, on the basis described in Schedule 3 (Project G), for the purposes of remediating potential impacts to offshore islands and the Cane River Conservation Park and proposed extensions to be released on an as-needs basis to DEC, where impacts can be reasonably attributed to the Proposal, as determined by the CEO, on advice from the DEC and the Proponent. The contingency funding will continue to be available until one year after the date of first shipment of product from the LNG plant.	Maintain a contingency fund, as described in Schedule 3 (Project G) of this Statement, with a purpose as outlined in 873:M22.9 until one year after the date of first shipment of product from the LNG plant. Ensure that contingency funds, as outlined in 873:M22.9, are released on an as-needs basis to the DEC, where impacts can be reasonably attributed to the Project, as determined by the CEO, on advice from the DEC and Chevron.	Records demonstrating that a contingency fund, as described in Schedule 3 (Project G) of this Statement, with a purpose as outlined in 873:M22.9 was maintained until one year after the date of first shipment of product from the LNG plant. Records demonstrating that contingency funds, as outlined in 873:M22.9, were released on an as-needs basis to the DEC, where impacts were reasonably attributed to the Project, as determined by the CEO, on advice from the DEC and Chevron.	Overall	\$250 000*, to be maintained by the Proponent until one year after the date of first shipment of product from the LNG plant. (*Indexed to CPI)	Completed	First LNG Cargo was on 31 October 2017; therefore, the contingency fund was maintained until 31 October 2018.
873:M22.10	Residual Impacts and Risk Management Measures	The real value of funding for Projects D, E and G will be maintained through indexation to the Perth consumer price index (CPI), with the first adjustment occurring on 30 January 2013.	Ensure that the real value of funding for Projects D, E and G are maintained through indexation to the Perth consumer price index (CPI), with the first adjustment occurring on 30 January 2013.	Records demonstrating that the real value of funding for Projects D, E and G was maintained through indexation to the Perth consumer price index (CPI), and the first adjustment occurred on 30 January 2013.	Overall	\$250 000*, to be maintained by the Proponent until one year after the date of first shipment of product from the LNG plant. (* indexed to CPI)	Completed	Funding for Projects D, E and G have included CPI adjustment. CPI rates taken from the Australian Bureau of Statistics website: http://www.abs.gov.au/AUSSTATS
873:M23.1	Staging of Plans	Where a plan, program, report, survey strategy or other document is required by these conditions to be prepared, submitted or approved prior to commencement of an activity, it is required that the plan, program, report, survey strategy or other document to be prepared, submitted or approved as per the relevant condition requirements for the component or stage of	Ensure that all plans, programs, reports, survey strategies, or other documents required by this Statement, are prepared, submitted, or approved prior to the commencement of the relevant activity.	Records demonstrating that all plans, programs, reports, survey strategies, or other documents required by this Statement, were prepared, submitted, or approved prior to the commencement of the relevant activity.	Overall	For life of Project.	Compliant	This report; i.e. Wheatstone Project: Ministerial Statement 873 Compliance Assessment Report 2021 (ABU210801348). All plans, programs, reports, survey strategies, or other documents required by these conditions have been prepared, submitted, or approved before commencing the relevant activity and in compliance with the requirements of the relevant conditions.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		the facility or activity before the Proponent commences the activity.						
873:M24.1	Review of Plans	If the Proponent amends any plan, program, report or strategy or other document required by these conditions, the Proponent must implement the amended plan from the date of the amendment.	Ensure that any amendment to a plan, program, report or strategy, or other document, required by this Statement, is implemented from the date of the amendment.	Records demonstrating that any amendment to a plan, program, report or strategy, or other document, required by this Statement, was implemented from the date of the amendment.	Overall	From the date of the amendment.	Not required at this stage	No plans, programs, reports, strategies or other documents required by these conditions were amended during the reporting period.
873:M24.2	Review of Plans	If any plan, program, report or strategy is required to be approved under these conditions, the Proponent may only make a significant amendment to the plan, program, report or strategy if the amendment is also approved. Significant amendments are those amendments which alter the obligations of the Proponent, that is, are not minor or administrative.	Ensure that all significant (as defined by 873:M24.2) amendments to any plan, program, report, or strategy are approved under this Statement.	Records demonstrating that all significant (as defined by 873:M24.2) amendments to any plan, program, report, or strategy were approved under this Statement.	Overall	For life of Project.	Not required at this stage	See 873:M24.1.
873:M25.1	Onslow Solar Salt Agreement Act	No nearshore or offshore marine facilities shall be constructed within any area subject to the <i>Onslow Solar Salt Agreement Act 1992</i> without the agreement of the Minister for Environment on the advice of the Minister for State Development.	Ensure that no nearshore or offshore marine facilities are constructed within any area subject to the <i>Onslow Solar Salt Agreement Act 1992</i> without the agreement of the Minister for Environment on the advice of the Minister for State Development.	Records demonstrating that no nearshore or offshore marine facilities were constructed within any area subject to the <i>Onslow Solar Salt Agreement Act 1992</i> without the agreement of the Minister for Environment on the advice of the Minister for State Development. Records demonstrating any agreement from the Minister for Environment on the advice of the Minister for State Development with regards to the requirements of 873:M25.1.	Overall	For life of Project.	Completed	Letter from CAPL to OEPA, 23 July 2013, confirming that no nearshore or offshore marine facilities will be constructed in the area subject to the <i>Onslow Solar Salt Agreement Act 1992</i> (WA) (WS0-0000-HES-LET-CVX-EPA-00059).

5 Acronyms and Abbreviations

Table 5-1 defines the acronyms and abbreviations used in this document.

Table 5-1: Acronyms and Abbreviations

Acronym/Abbreviation	Definition
~	Approximately
ABU	Australian Business Unit
AEDR	Air Emissions Design Report
ANSIA	Ashburton North Strategic Industrial Area
CAPL	Chevron Australia Pty Ltd
CCG	Cape Conservation Group
CEO	Chief Executive Officer
COFWWDP	Construction Onshore Facilities Waste Water Discharge Plan
CPI	Consumer Price Index
CPMMP	Coastal Processes Monitoring and Management Plan
CSMFIMP	Conservation Significant Marine Fauna Interaction Management Plan
DAWE	Commonwealth Department of Agriculture, Water and the Environment and Energy (formerly Department of the Environment and Water [DEW]; Department of the Environment, Water, Heritage and the Arts [DEWHA]; Department of Sustainability, Environment, Water, Population and Communities [SEWPaC]; Department of the Environment [DotE]; Department of the Environment and Energy [DotEE]) (DAWE dates: from 1 January 2020 to [ongoing]).
DBCA	Western Australian Department of Biodiversity, Conservation, and Attractions (from 1 July 2017; formerly Department of Parks and Wildlife [DPaW]) (DBCA dates: from 1 Jul 2017 to [ongoing])
DDSPMMP	Dredging and Dredge Spoil Placement Environmental Monitoring and Management Plan
DEC	Former Western Australian Department of Environment and Conservation, then split into Department of Environment Regulation and Department of Parks and Wildlife [DPaW]. Now Department of Biodiversity, Conservation, and Attractions (DBCA; from 1 July 2017) and Department of Water and Environmental Regulation (DWER; from 1 July 2017). (DEC dates: 1 Jul 2006 to 30 Jun 2013; was an amalgamation of Department of the Environment and Department of Conservation and Land Management)
DER	Former Western Australian Department of Environment Regulation (previously DEC; now DWER [from 1 July 2017]) (DER dates: 1 Jul 2013 to 30 Jun 2017)
DEW	Former Commonwealth Department of the Environment and Water (now Department of Agriculture, Water and the Environment [DAWE]) (DEW dates: from 30 Jan 2007 to 3 Dec 2007)
DEWHA	Former Commonwealth Department of the Environment, Heritage and the Arts (now Department of Agriculture, Water and the Environment [DAWE]; DEWHA dates: From 3 Dec 2007 to 14 Sep 2010)
DMIRS	Western Australian Department of Mines, Industry Regulation and Safety (from 1 July 2017 to [ongoing]; formerly Department of Mines and Petroleum [DMP] and Department of Commerce)
DMP	Former Western Australian Department of Mines and Petroleum (formerly Western Australia Department of Industry and Resources [DoIR]; now Department of Mines, Industry Regulation and Safety [DMIRS] [from 1 July 2017]; DMP dates: 1 January 2009 to 1 July 2017)

Acronym/ Abbreviation	Definition
DoF	Former Western Australian Department of Fisheries (now DPIRD [from 1 July 2017])
DoIR	Former Western Australian Department of Industry and Resources, then DMP (now DMIRS [from 1 July 2017]; DoIR dates: from 3 Feb 2003 to 1 Jan 2009)
Domgas	Domestic gas
DotE	Former Commonwealth Department of the Environment (formerly DEW, DEWHA, and SEWPaC; now Commonwealth Department of Agriculture, Water and the Environment [DAWE]) (DotE dates: from Oct 1997 to Oct 1998; then from 18 Sep 2013 to 19 Jul 2016)
DotEE	Former Commonwealth Department of the Environment and Energy (formerly DEW, DEWHA, and SEWPaC, and DotE); now Commonwealth Department of Agriculture, Water and the Environment [DAWE] (DotEE dates: from 19 Jul 2016 to 1 February 2020)
DoW	Former Western Australian Department of Water (now part of DWER [from 1 July 2017]; DoW dates: from 2006 to 30 June 2017)
DPA	Dampier Port Authority
DPaW	Former Western Australian Department of Parks and Wildlife (previously DEC; now DBCA [from 1 July 2017]) (DPaW dates: 1 July 2013 to 30 June 2017)
DPIRD	Western Australian Department of Primary Industries and Regional Development (formerly Department of Agriculture and Food, DoF, and Department of Regional Development and Lands) (from 1 Jul 2017 to [ongoing])
DTAP	Dredging Technical Advice Panel
DWER	Western Australian Department of Water and Environmental Regulation (formerly DER and OEPA) (from 1 July 2017 to [ongoing])
EP Act	Western Australian <i>Environmental Protection Act 1986</i>
EPBC 2008/4469	Commonwealth Ministerial Approval (for the Wheatstone Project) as amended or replaced from time to time.
EPBC Act	Commonwealth <i>Environment Protection and Biodiversity Conservation Act 1999</i>
ERM	Environmental Resources Management (Australia)
GIS	Geographic Information System
HP	High Pressure
IBC	Intermediate Bulk Container
km	Kilometre
LFA	Landscape Function Analysis
LNG	Liquefied Natural Gas
LP	Low Pressure
MAMTCPMP	Mangrove Algal Mat, and Tidal Creek Protection Management Plan
MFO	Marine Fauna Observer
MIP	Marine Infrastructure Plan
MOF	Materials Offloading Facility
MOM	Marine Outfalls Mapping
MS	(Western Australian) Ministerial Statement
MS 1130	Western Australian Ministerial Statement 1130 (for the Wheatstone Project) as amended from time to time

Acronym/ Abbreviation	Definition
MS 873	Western Australian Ministerial Statement 873 (for the Wheatstone Project) as amended from time to time
MS 903	Western Australian Ministerial Statement 903 (for the Wheatstone Project) as amended from time to time
MS 922	Western Australian Ministerial Statement 922 (for the Wheatstone Project) as amended from time to time
MS 931	Western Australian Ministerial Statement 931 (for the Wheatstone Project) as amended from time to time
MTPA	Million tonnes per annum
OEPA	Former Office of the (Western Australian) Environmental Protection Authority (now DWER [from 1 July 2017])
POFWWDP	Permanent Onshore Facilities Waste Water Discharge Plan
PPA	Pilbara Ports Authority
Q1, Q2 etc.	Three-month quarter of a calendar year
SEWPaC	Former Commonwealth Department of Sustainability, Environment, Water, Population and Communities (formerly DEW and DEWHA; now DAWE) (SEWPaC dates: 14 Sep 2010 to 18 Sep 2013)
State Waters	The marine environment within three nautical miles of the mainland of Western Australia or its islands
TIEMMP	Trunkline Installation Environmental Monitoring and Management Plan
TMO	Temporary Marine Outfall
TRIP	Trunkline Route and Infrastructure Plan
UNMRP	Underwater Noise Monitoring and Review Program
WA	Western Australia
WAMSI	Western Australian Marine Science Institution
Wheatstone Project	The Project as approved under Ministerial Statement No. 873 (as amended)
